Thank you for purchasing a JVC product. Please read all instructions carefully before operation, to ensure your complete understanding and to obtain the best possible performance from the unit.

CONTENTS

BASIC OPERATIONS 4

RADIO BASIC OPERATIONS 5

- Listening to the radio 5
- Storing stations in memory 6
 - FM station automatic preset: SSM 6
 - Manual preset 7
- Tuning into a preset station 8

RDS OPERATIONS 9

- What you can do with RDS EON 9
 - Tracing the same programme automatically (Network-Tracking Reception) 9
 - Using Standby Reception 11
 - Selecting Your Favorite Programme for PTY Standby Reception 12
 - Searching Your Favorite Programme 12
- Other convenient RDS functions and adjustments 15
 - Automatic selection of the station when using the number buttons 15
 - Changing the display mode while listening to an FM station 15
 - Setting the TA volume level 15
 - Automatic clock adjustment 16

TAPE OPERATIONS 17

- Listening to a tape 17
 - Automatic tape type detection 18
 - Prohibiting cassette ejection 18
- Finding the beginning of a tune 19
- Other convenient tape functions 20
 - Turning on/off Tuner Call Play 20
 - Skipping the blank portions on the tape 20
 - Playing the current tune repeatedly 20

SOUND ADJUSTMENTS 21

- Turning on/off the BBE function 21
- Selecting preset sound modes 22
- Adjusting the sound 23
- Storing your own sound adjustments 24

BEFORE USE

- * For safety...
 - Do not raise the volume level too much, as this will block outside sounds, making driving dangerous.
 - Stop the car before performing any complicated operations.

* Temperature inside the car...

If you have parked the car for a long time in hot or cold weather, wait until the temperature in the car becomes normal before operating the unit.

OTHER MAIN FUNCTIONS 25

- Setting the clock 25
- Changing the general settings (PSM) 26
 - Selecting the clock display 28
 - Selecting the CD Text information display 28
 - Selecting the level display 28
 - Selecting the dimmer mode 29
 - Controlling the volume automatically (Audio Cruise) 29
 - Selecting the telephone muting 31
 - Turning on/off the key-touch tone 31
 - Turning on/off the power amplifier switch 31
 - Selecting the scroll mode 32
 - Setting the name of the external component 32
 - Selecting the frequency cutoff point 32
- Detaching the control panel 33

REMOTE OPERATIONS 34

- Installing the batteries 34
- Using the remote controller 35

CD CHANGER OPERATIONS 36

- Playing CDs 36
- Selecting CD playback modes 38
- Playing a CD text 38

EXTERNAL COMPONENT OPERATIONS 39

- Using auxiliary players 39
- Using a subwoofer 39

DAB TUNER OPERATIONS 40

- Tuning into an ensemble and one of the services 40
- Storing DAB services in memory 42
- Tuning into a preset DAB service 44

MAINTENANCE 45

- To extend the lifetime of the unit 45
- How to reset your unit 45

TROUBLESHOOTING 46

SPECIFICATIONS 47

Note:

For security reasons, a numbered ID card is provided with this unit, and the same number is imprinted on the unit's chassis. Keep the card in a safe place, as it will help the authorities to identify your unit if stolen.

BASIC OPERATIONS

ENGLISH

Note:
When you use this unit for the first time, set the built-in clock correctly. (See page 25.)

1 Turn on the power.

Note on One-Touch Operation:
When you select a source in step 2 below, the power automatically comes on. You do not have to press this button to turn on the power.

2 Select the source.
To operate the tuner, see pages 5 – 16.
To operate the cassette deck, see pages 17 – 20.
To operate the CD changer, see pages 36 – 38.
To operate the external component connected to the auxiliary input jack on the front panel, see page 39.
To operate the DAB tuner, see pages 40 – 44.

3 Adjust the volume.
Volume level appears.

4 Adjust the sound as you want (see pages 21 – 24).

To drop the volume in a moment
Press **⏻/ATT** briefly while listening to any source. "ATT" starts flashing on the display, and the volume level will drop in a moment.

To resume the previous volume level, press the button briefly again.

To turn off the power
Press **⏻/ATT** for more than 1 second.

RADIO BASIC OPERATIONS

Listening to the radio

ENGLISH

1 Select the band (FM1, FM2, FM3 or AM).
You can select any one of FM1, FM2, and FM3 to listen to an FM station.

2 Start searching a station.
When a station is received, searching stops.

To stop searching before a station is received, press the same button you have pressed for searching.

To tune in a particular frequency without searching:
1 Press FM/AM/DAB repeatedly to select the band (FM or AM).
2 Press and hold **⏻** or **⏩** until "MANU" (manual) starts flashing on the display. Now you can manually change the frequency while "MANU" is flashing.
3 Press **⏻** or **⏩** repeatedly until the frequency you want is reached.
• If you hold down the button, the frequency keeps changing (in 50 kHz intervals for FM and 9 kHz intervals for AM-MW/LW) until you release the button.

To tune in FM stations with only strong signals
Press RPT/LO (Repeat/Local) so that the LOCAL indicator lights up on the display. Each time you press the button, the LOCAL indicator lights up and goes off alternately.

Note:
This function only works while searching FM stations including SSM preset (see page 6).

Storing stations in memory

You can use one of the following two methods to store broadcasting stations in memory.

- Automatic preset of FM stations: SSM (Strong-station Sequential Memory)
- Manual preset of both FM and AM stations

FM station automatic preset: SSM
You can preset 6 local FM stations in each FM band (FM1, FM2 and FM3).

ENGLISH

1 Select the FM band number (FM1, FM2 or FM3) you want to store FM stations into.

2 Press and hold both buttons for more than 2 seconds.

"SSM" appears, then disappears when automatic preset is over.

Local FM stations with the strongest signals are searched and stored automatically in the band number you have selected (FM1, FM2 or FM3). These stations are preset in the number buttons — No. 1 (lowest frequency) to No. 6 (highest frequency).
When automatic preset is over, the station stored in number button 1 will be automatically tuned in.

Manual preset

You can preset up to 6 stations in each band (FM1, FM2, FM3 and AM) manually.

EXAMPLE: Storing an FM station of 88.3 MHz into the preset number 1 of the FM1 band

ENGLISH

1 Select the FM1 band.

2 Tune into a station of 88.3 MHz.
See page 5 to tune into a station.

3 Press and hold the number button (in this example, 1) for more than 2 seconds.

Preset number and "MEMO" flashes alternately for a while.

4 Repeat the above procedure to store other stations into other preset numbers.

Notes:

- A previously preset station is erased when a new station is stored in the same preset number.
- Preset stations are erased when the power supply to the memory circuit is interrupted (for example, during battery replacement). If this occurs, preset the stations again.

RDS OPERATIONS

ENGLISH

Tuning into a preset station

You can easily tune into a preset station. Remember that you must store stations first. If you have not stored them yet, see pages 6 and 7.

- 1 Select the band (FM1, FM2, FM3 or AM) you want.
- 2 Select the number (1 – 6) for the preset station you want.

To change the display information while receiving an FM RDS station

Press DISP. Each time you press the button, the display changes as follows:

→ PS (Station name) → Station Frequency → PTY (Programme type)

When an FM stereo broadcast is hard to receive:

Press MO/RND/□ (Mono/Random) while listening to an FM stereo broadcast. The MO (Mono) indicator lights up on the display. The sound you hear becomes monaural but reception will be improved.

To restore the stereo effect, press the button again.

What you can do with RDS EON

RDS (Radio Data System) allows FM stations to send an additional signal along with their regular programme signals. For example, the stations send their station names, as well as information about what type of programme they broadcast, such as sports or music, etc. Another advantage of RDS function is called "EON (Enhanced Other Networks)." The EON indicator lights up while receiving an FM station with the EON data. By using the EON data sent from a station, you can tune into a different station of a different network broadcasting your favorite programme or traffic announcement while listening to another programme or to another source such as tape.

- By receiving the RDS data, this unit can do the following:
- Tracing the same programme automatically (Network-Tracking Reception)
 - Standby Reception of TA (Traffic Announcement) or your favorite programme
 - PTY (Programme Type) search
 - TP (Traffic Programme) search
 - And some other functions

Tracing the same programme automatically (Network-Tracking Reception)

When driving in an area where FM reception is not good, the tuner built in this unit automatically tune in another RDS station, broadcasting the same programme with stronger signals. So, you can continue to listen to the same programme in its finest reception, no matter where you drive. (See the illustration on the next page.) Two types of the RDS data are used to make Network-Tracking Reception work correctly — PI (Programme Identification) and AF (Alternative Frequency). Without receiving these data correctly from the RDS station you are listening to, Network-Tracking Reception will not operate.

To use Network-Tracking Reception, press and hold TP/RDS (Traffic Programme/Radio Data System) for more than 1 second. Each time you press and hold the button, Network-Tracking Reception modes change as follows:

→ Mode 1 → Mode 2 → Mode 3

Using Standby Reception

Standby Reception allows the unit to switch temporarily to your favorite programme (PTY: Programme Type) and Traffic Announcement (TA) from the current source (another FM station, tape, CD and other connected components).

Note: Standby Reception will not work if you are listening to an AM station.

TA Standby Reception

- When you press TP/RDS while listening to an FM station, the TP indicator is lit during reception of a TP (Traffic Programme) station and the TA standby mode is engaged.

Note: When the station being received is not a TP station, the TP indicator flashes. Press <Left> or <Right> to engage the TA standby mode. "SEARCH" appears on the display, and TP station search starts. When a TP station is tuned in, the TP indicator is lit.

- If you are listening to a tape or CD, and wish to listen to a TP station, press TP/RDS to enter the TA standby mode. (The TP indicator lights up.)

If a traffic programme starts broadcasting while the TA standby mode is active, "TRAFFIC" appears and the playback source changes to the FM band. The volume increases to the preset TA volume level and the traffic programme can be heard (see page 15).

To deactivate the TA standby mode, press TP/RDS again.

PTY Standby Reception

- When you press PTY while listening to an FM station, the PTY indicator is lit during reception of a PTY station and the PTY standby mode is engaged. The selected PTY name stored on page 13 flashes for 5 seconds.

Note: When the station being received is not a PTY station, the PTY indicator flashes. Press <Left> or <Right> to engage the PTY standby mode. "SEARCH" appears on the display, and PTY station search starts. When a PTY station is tuned in, the PTY indicator is lit.

- If you are listening to a tape or CD, and wish to listen to a selected PTY broadcast, press PTY to enter the PTY standby mode. (The PTY indicator lights up.)

If the selected PTY programme starts broadcasting while the PTY standby mode is active, the selected PTY name appears and the playback source changes to the FM band. The selected PTY programme can then be heard.

To deactivate the PTY standby mode, press PTY again.

ENGLISH

ENGLISH

ENGLISH

Mode 1

The AF indicator lights up but the REG indicator does not. Network-Tracking is activated with Regionalization set to "off." Switches to another station within the same network when the receiving signals from the current station become weak.

Note: In this mode, the programme may differ from the one currently received.

Mode 2

Both the AF indicator and the REG indicator light up. Network-Tracking is activated with Regionalization set to "on." Switches to another station, within the same network, broadcasting the same programme when the receiving signals from the current station become weak.

Mode 3

Neither the AF indicator nor the REG indicator lights up. Network-Tracking is deactivated.

The same programme can be received on different frequencies.

Selecting Your Favorite Programme for PTY Standby Reception

You can select your favorite programme for PTY Standby Reception to store in memory. When shipped from the factory, "NEWS" is stored as the programme type for PTY Standby Reception.

- 1 Press and hold SEL (select) for more than 2 seconds to call up the Preferred Setting Mode (PSM: see page 26).
- 2 Select "PTY STBY (standby)" if not shown on the display.
- 3 Select one of twenty-nine PTY codes. (See page 16.)
Selected code name appears on the display and is stored into memory.
- 4 Finish the setting.

Searching Your Favorite Programme

You can search one of your 6 favorite programme types stored in memory. When shipped from the factory, the following 6 programme types have been stored in the number buttons (1 to 6).

To change the factory preset settings, see page 13.

To search your favorite programme, see page 14.

1	2	3	4	5	6
POP M	ROCK M	EASY M	CLASSICS	AFFAIRS	VARIED

To store your favorite programme types

- 1 Press and hold SEL (select) for more than 2 seconds to call up the Preferred Setting Mode (PSM: see page 26).
- 2 Select "PTY SRCH (search)" if not shown on the display.
- 3 Select one of twenty-nine PTY codes. (See page 16.)
Selected code name appears on the display.
• If the code already stored in memory is selected, it will flash on the display.
- 4 Press and hold the number button for more than 2 seconds to store the PTY code selected into the preset number you want.
PTY preset number appears, and selected code name and "MEMORY" alternates on the display.
- 5 Finish the setting.

To search your favorite programme type

- 1 Press and hold PTY (programme type) for more than 1 second while listening to an FM station.
The last selected PTY code and preset number appear.

- 2 Select one of PTY codes stored in preset number buttons (1 to 6).

Ex. When "ROCK M" is stored in preset number button 2.
PTY search for your favorite programme starts after 5 seconds.

- If there is a station broadcasting a programme of the same PTY code you selected, that station is tuned in.
- If there is no station broadcasting a programme of the same PTY code you selected, the station will not change.

Note:
In some areas, the PTY search will not work correctly.

Other convenient RDS functions and adjustments

Automatic selection of the station when using the number buttons

Usually when you press the number button, the preset station is tuned in. However, when the preset station is an RDS station, something different will happen. If the signals from that preset station are not sufficient for good reception, this unit starts searching another station broadcasting the same programme as the original preset station is broadcasting, then if any station broadcasting the same programme is found, the station will be tuned in.

Changing the display mode while listening to an FM station

You can change the initial indication on the display to either station name (PS) or to station frequency, while listening to an FM RDS station.
• See also "Changing the general settings (PSM)" on page 26.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "TU DISP (tuner display)" with \blacktriangle or \blacktriangleleft .
3. Set to the desired indication (either station name or station frequency) with the control dial.

Note:
By pressing DISP, you can also change the display while listening to an FM RDS station. Each time you press the button, the following information appears on the upper part of the display:

→ PS (Station name) → Station Frequency → PTY (Programme type) →

* Then, the display goes back to the original indication in several seconds.

Setting the TA volume level

You can preset the volume level for TA Standby Reception. When a traffic programme is received, the volume level automatically changes to the preset level.
• See also "Changing the general settings (PSM)" on page 26.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "TA VOL (volume)" with \blacktriangle or \blacktriangleleft .
3. Set to the desired volume with the control dial.

TAPE OPERATIONS

Automatic clock adjustment

When shipped from the factory, the clock built in this unit is set to be readjust automatically using the CT (Clock Time) data in the RDS signal. If you do not want to use automatic clock adjustment, follow the procedure below.

• See also "Changing the general settings (PSM)" on page 26.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "AUTO ADJ (adjust)" with \blacktriangle or \blacktriangledown .
3. Select "OFF" by turning the control dial counterclockwise. Now automatic clock adjustment is canceled.

To reactivate clock adjustment, repeat the same procedure and select "ON" in step 3 by turning the control dial clockwise.

Note:

It takes about 2 minutes to adjust the time using the CT data. So, you must tune to the station for more than 2 minutes continuously; otherwise, the clock time will not be adjusted.

PTY codes

NEWS:	News	SOCIAL:	Programmes on social activities
AFFAIRS:	Topical programmes expanding on current news or affairs	RELIGION:	Programmes dealing with any aspect of belief or faith, or the nature of existence or ethics

Listening to a tape

1

Open the control panel.

2

1. Insert a cassette into the cassette compartment. The unit turns on and tape play starts automatically.
2. Close the control panel by hand.

• When one side of the tape reaches its end during play, the other side of the tape automatically starts playing. (Auto Reverse)

Note on One-Touch Operation:

When a cassette is already in the cassette compartment, pressing TAPE \blacktriangle turns on the unit and starts tape play automatically.

3

Select the tape direction.

Each time you press the button, the tape direction changes alternately – forward (FWD PLAY) and reverse (REV PLAY).

To play back tapes recorded with the Dolby B NR

Press the MO/RND button to set the Dolby B NR* system as required in step 2 above. The \square indicator lights up, and "DOLBY B" appears on the display for several seconds. To cancel the Dolby B NR, press the same button again.

* Dolby noise reduction manufactured under license from Dolby Laboratories Licensing Corporation. "DOLBY" and the double-D symbol \square are trademarks of Dolby Laboratories Licensing Corporation.

To stop play and eject the cassette

Press Δ .

Tape play stops and the cassette automatically ejects from the cassette compartment. If you change the source to FM, AM, CD changer or AUX, the tape play also stops (without ejecting the cassette this time).

• You can also eject the cassette with the unit turned off.

To fast-forward and rewind a tape

• Press $\blacktriangle\blacktriangle$ for more than 1 second to fast-forward the tape. When the tape reaches its end, the tape is reversed and playback starts from the beginning of the other side.

• Press $\blacktriangledown\blacktriangledown$ for more than 1 second to rewind the tape. When the tape reaches its end, playback of the same side starts.

To stop fast forward and rewind at any position on the tape, press TAPE \blacktriangle . Tape play starts from that position on the tape.

Note:

While fast-forwarding or rewinding, this unit changes the source to the tuner. (Tuner Call Play) If you do not want to use Tuner Call Play, you can cancel this function. See page 20 for details.

Automatic tape type detection

With the Automatic Tape Type Detection mechanism provided for this unit, you can listen to type I, II and IV tapes without changing any settings.

Prohibiting cassette ejection

You can prohibit the cassette ejection and can "lock" a cassette in the cassette compartment. Press and hold TAPE \blacktriangle and \square /I/ATT for more than 2 seconds. "NO EJECT" flashes on the display for about 5 seconds, and the cassette is "locked."

To cancel the prohibition and "unlock" the cassette, press and hold TAPE \blacktriangle and \square /I/ATT for more than 2 seconds again. "EJECT OK" flashes for about 5 seconds, and this time the cassette is "unlocked."

Finding the beginning of a tune

Multi Music Scan allows you to automatically start playback from the beginning of a specified tune. You can specify up to 9 tunes ahead of or before the current tune.

During playback

To locate a tune ahead of the current tune on the tape

To locate a tune before the current tune on the tape

Specify how many tunes ahead of or before the current tune the tune you want is located.

Each time you set the tune, the number changes up to ± 9 .

When the beginning of the specified tune is located, playback starts automatically.

Notes:

- While locating a specified tune:
 - If the tape is rewound to its beginning, playback starts from the beginning of that side.
 - If the tape is fast-forwarded to the end, it is reversed and played from the beginning of the other side.
- In the following cases, the Multi Music Scan function may not operate correctly:
 - Tapes with tunes having long pianissimo passages (very quiet parts) or non-recorded portions between tunes.
 - Tapes with short non-recorded sections.
 - Tapes with high level of noise or humming between tunes.
 - The Dolby NR setting does not match. For example, if Dolby B NR is on and the tape is recorded with no Dolby NR.

ENGLISH

ENGLISH

Other convenient tape functions

Turning on/off Tuner Call Play

When you start fast-forwarding or rewinding a tape, the source changes to the tuner temporarily and you can listen to the last received station. After fast forward or rewind is stopped, tape play resumes automatically. When shipped from the factory, Tuner Call Play has been activated.

• See also "Changing the general settings (PSM)" on page 26.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
 2. Select "TU CALL (tuner call)" with $\blacktriangle\blacktriangleright$ or $\blacktriangleleft\blacktriangleright$.
 3. Set to the desired mode with the control dial.
- The Tuner Call Play mode alternates between on and off.

Skiping the blank portions on the tape

You can skip blank portions between the tunes. (Blank Skip)
When this function is on, the unit skips blank portions of 15 seconds or more, fast-forwards to the next tune, then starts playing it.

• See also "Changing the general settings (PSM)" on page 26.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
 2. Select "B. SKIP (blank skip)" with $\blacktriangle\blacktriangleright$ or $\blacktriangleleft\blacktriangleright$.
 3. Select the desired mode with the control dial.
- The Blank Skip mode alternates between on and off.

Note:

When the tape reaches its end while fast-forwarding, the tape direction will be changed automatically.

Playing the current tune repeatedly

You can play the current tune repeatedly. (Repeat Play)

Each time you briefly press RPT/LO (Repeat/Local) while playing a tape, Repeat Play turns on and off alternately.

Lights up when Repeat Play is turned on.

Notes:

- In the following cases, Blank Skip and Repeat Play may not operate correctly:
 - Tapes with tunes having long pianissimo passages (very quiet parts) or non-recorded portions during tunes.
 - Tapes with short non-recorded sections.
 - Tapes with high level noise or humming between tunes.
 - The Dolby NR setting does not match. For example, if Dolby B NR is on and the tape was recorded with no Dolby NR.

BBE

Turning on/off the BBE function

The BBE* function restores the brilliance and clarity of the original live sound in recording, broadcasts, etc.

When a speaker reproduces sound, it introduces frequency-dependent phase shifting, causing high-frequency sounds to take longer to reach the ear than low frequency sounds. The BBE function adjusts the phase relationship between the low, mid and high frequencies by adding a progressively longer delay time to the low and mid frequencies, so that all frequencies reach the listener's ears at the proper time.

In addition, the BBE function boosts low and high frequencies, which loudspeakers tend to be less efficient in reproducing, through dynamic, program-driven augmentation. When combined with the phase compensation feature, the resulting sound has a clearer, more finely detailed "live" presence.

Each time you press BBE, the BBE function turns on and off alternately.

* Under license from BBE Sound, Inc.

BBE is a trademark of BBE Sound, Inc.

ENGLISH

ENGLISH

Selecting preset sound modes

You can select a preset sound adjustment suitable to the music genre.

Each time you press SOUND, the sound control mode (SCM) changes as follows.

Indication	For:	Preset values		
		Bass	Treble	BBE
SCM OFF	(Flat sound)	00	00	On
BEAT	Rock or disco music	+02	00	On
SOFT	Quiet background music	+01	-03	Off
POP	Light music	+04	+01	Off

Notes:

- You can adjust the preset sound control mode to your preference, and store in memory. If you want to adjust and store your original sound control mode, see "Storing your own sound adjustments" on page 24.
- To adjust only the bass and treble reinforcement levels to your preference, see "Adjusting the sound" on page 23.

Adjusting the sound

You can adjust the sound characteristics to your preference.

1

Select the item you want to adjust.

Indication	To do:	Range
BAS (Bass)	Adjust the bass	-06 (min.) — +06 (max.)
TRE (Treble)	Adjust the treble	-06 (min.) — +06 (max.)
FAD (Fader)*	Adjust the front and rear speaker balance	R06 (rear only) — F06 (front only)
BAL (Balance)	Adjust the left and right speaker balance	L06 (left only) — R06 (right only)
WOOFER (Subwoofer)	Adjust the subwoofer	0 (min.) — 8 (max.)
VOL (Volume)	Adjust the volume	00 (min.) — 50 (max.)

Note:

* If you are using a two-speaker system, set the fader level to "00."

2

Adjust the level.

Note:
Normally the control dial works as the volume control. So you do not have to select "VOL" to adjust the volume level.

OTHER MAIN FUNCTIONS

Storing your own sound adjustments

You can adjust the sound modes (BEAT, SOFT, POP: see page 22) to your preference and store your own adjustments in memory.

- 1 Call up the sound mode you want to adjust. See page 22 for details.
- 2 **Within 5 seconds**
 - 1 To adjust the bass or treble level
 - 1 Select "BAS" or "TRE."
 - 2 Adjust the bass or treble level.
 - 2 To turn on or off the BBE function
See page 21.
- 3 **Within 5 seconds**
Press and hold SOUND until the sound mode you selected flashes on the display. Your setting is stored in memory.
- 4 Repeat the same procedure to store other settings.

To reset to the factory settings

Repeat the same procedure and reassign the preset values listed in the table on page 22.

Setting the clock

You can also set the clock system either to 24 hours or 12 hours.

- 1 Press and hold SEL (select) for more than 2 seconds so that one of the PSM items appears on the display.
- 2 **1** Set the hour.
 - 1 Select "CLOCK H (Hour)" if not shown on the display.
 - 2 Adjust the hour.
- 3 **1** Set the minute.
 - 1 Select "CLOCK M (Minute)."
 - 2 Adjust the minute.
- 4 **1** Set the clock system.
 - 1 Select "24H/12H."
 - 2 Select "24H" or "12H."
- 5 Finish the setting.

To check the current clock time while the unit is turned off, press DISP. The power turns on, the clock time is shown for 5 seconds, then the power turns off.

Changing the general settings (PSM)

You can change the items listed on the next page by using the PSM (Preferred Setting Mode) control.

Basic Procedure

- 1 Press and hold SEL (select) for more than 2 seconds so that one of the PSM items appears on the display.
- 2 Select the PSM item you want to adjust. (See page 27.)
- 3 Select or adjust the PSM item selected above.
- 4 Finish the setting.

* When you select "CRUISE 1" or "CRUISE 2" for Audio Cruise Mode, you can adjust these items.

• Press SEL (select) when the setting is complete.

Selecting the clock display

You can select either the clock or the source name to be shown on the lower part of the display. When shipped from the factory, the clock is selected.

- ON: Clock
- OFF: Source name (or station band)

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "CLOCK" with or .
3. Select the desired mode with the control dial.

The clock display mode alternates between on and off.

ON ↔ OFF

To check the other information during play

Press DISP (display). Each time you press the button, the other information (either the clock or the source name) will be shown on the lower part of the display for a while.

Selecting the CD Text information display

You can select what type of the CD Text information to be shown on the display while a CD Text is playing. When shipped from the factory, the playing time is selected.

- P-TIME: Playing time (elapsed) appears on the display.
- D-TITLE: Disc title appears on the display.
- T-TITLE: Track titles appear on the display.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "CH DISP (display)" with or .
3. Select the desired mode with the control dial.

The CD Text information display mode changes as follows:

→ P-TIME ↔ D-TITLE ↔ T-TITLE →

To check the other information during play

Press DISP (display). Each time you press the button, the other information (playing time, disc title, and track titles) will be shown on the upper part of the display for a while.

Selecting the level display

You can select the level display according to your preference. When shipped from the factory, the level indicator on the display shows the audio level.

- AUDIO: Audio level indicator
- OFF: Volume level indicator

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "LEVEL" with or .
3. Select the desired mode with the control dial.

The level display setting changes as follows:

AUDIO ↔ OFF

To adjust the volume increase rate

If you find Audio Cruise increases (or decreases) the volume either too much or too little as the driving speed changes. You can adjust the increase rate by changing the boost level. To change it, follow the procedure below.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "CRUISE" with or .
3. Select either "CRUISE 1" or "CRUISE 2" with the control dial.
4. Select "BOOST" with or .
5. Select the desired boost level (among 01 to 15) as you want while the current boost level is shown on the display with the control dial.
 - To increase the volume increase rate, rotate it clockwise.
 - To decrease the volume increase rate, rotate it counterclockwise.

If Audio Cruise does not function correctly

You may need to store the idling speed into memory to make Audio Cruise function correctly.

NOTICE that a number of factors, such as electric power steering, wipers, power windows, air conditioner, etc. do generate noises and, as a result, may cause Audio Cruise not to function correctly. If this is the main cause of malfunction, connect the memory backup lead (yellow lead) directly to the car battery to prevent these noises from affecting Audio Cruise.

1. Start the engine and let it warm up.
2. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
3. Select "CRUISE" with or .
4. Select either "CRUISE 1" or "CRUISE 2" with the control dial.
5. Select "RPM SET" with or .
6. Select the desired idling speed as you want with the control dial.

When the setting is complete, the unit automatically checks to see if Audio Cruise functions correctly with this new idling setting. If it does not function correctly, Audio Cruise is canceled automatically and the idling setting becomes invalid.

- If this happens, see the NOTICE above.

Selecting the dimmer mode

When you turn on the car head lights, the display automatically dims (Auto Dimmer). When shipped from the factory, Auto Dimmer mode is activated.

- AUTO: Activates Auto Dimmer.
- ON: Always dims the display.
- OFF: Cancels Auto Dimmer.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "DIMMER" with or .
3. Select the desired mode with the control dial.

The dimmer mode changes as follows:

→ AUTO ↔ OFF ↔ ON →

Note on Auto Dimmer:

Auto Dimmer equipped with this unit may not work correctly on some vehicles, particularly on those having a control dial for dimming.

In this case, set the dimmer mode to "ON" or "OFF".

Controlling the volume automatically (Audio Cruise)

You can select the proper cruise mode for your car.

This unit change the volume level automatically (at 3 possible levels) based on the driving speed of your car by detecting the alternator's generating frequency (Audio Cruise).

If you want to use this mode, follow the procedures below. When shipped from the factory, this mode is set to "OFF".

- CRUISE 1: Select this if your car is relatively quiet.
- CRUISE 2: Select this if your car is relatively loud.
- OFF: Cancels Audio Cruise.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "CRUISE" with or .
3. Select the desired mode with the control dial.

The cruise mode changes as follows:

→ OFF ↔ CRUISE 1 ↔ CRUISE 2 →

When this function is turned on (the CRUISE indicator lights up on the display), the proper volume level is automatically selected among the 3 possible levels according to the driving speed, and the selected level is shown on the display.

Selecting the telephone muting

This mode is used when a cellular phone system is connected. Depending on the phone system used, select either "MUTING 1" or "MUTING 2" whichever mutes the sounds from this unit. When shipped from the factory, this mode is deactivated.

- MUTING 1: Select this if this setting can mute the sounds.
- MUTING 2: Select this if this setting can mute the sounds.
- OFF: Cancels the telephone muting.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "TEL (telephone)" with or .
3. Select the desired mode with the control dial.

The telephone muting mode changes as follows:

→ MUTING 1 ↔ MUTING 2 ↔ OFF →

Turning on/off the key-touch tone

You can deactivate the key-touch tone if you do not want to make it beep when you press a button. When shipped from the factory, the key-touch tone is activated.

- ON: Activates the key-touch tone.
- OFF: Deactivates the key-touch tone.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "BEEP" with or .
3. Select the desired mode with the control dial.

The key-touch tone alternates between on and off.

ON ↔ OFF

Turning on/off the power amplifier switch

You can switch off the built-in amplifier and send the audio signals only to the external amplifier(s) to get clear sounds and to prevent internal heat buildup inside this unit. When shipped from the factory, the power amplifier switch is turned on so that built-in amplifier works.

- ON: Select this mode when not using external power amplifier(s).
- OFF: Select this mode when using external power amplifier(s).

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "P-AMP SW (power amplifier switch)" with or .
3. Select the desired mode with the control dial.

The power amplifier switch alternates between on and off.

ON ↔ OFF

Selecting the scroll mode

You can select the scroll mode for the name display and disc information if it consists of more than 8 characters. When shipped from the factory, Auto Scroll mode is set to "ONCE."

- ONCE: Scrolls only once.
- AUTO: Repeats the scroll (5-second intervals in between).
- OFF: Cancels Auto Scroll.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "SCROLL" with \blacktriangle or \blacktriangleleft .
3. Select the desired mode with the control dial.

The scroll mode changes as follows:

ONCE \leftrightarrow AUTO \leftrightarrow OFF

Note:

Even if the scroll mode is set to "OFF," you can scroll the display by pressing DISP for more than 1 second.

Setting the name of the external component

You can select the name of the external component which will be shown on the upper part of the display when you press CD-CH/AUX. When shipped from the factory, the name of the external component is set to "EXTRA."

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "AUX (auxiliary)" with \blacktriangle or \blacktriangleleft .
3. Select the desired source name with the control dial.

The source name to be shown on the upper part of the display changes as follows:

EXTRA \leftrightarrow TV \leftrightarrow VIDEO \leftrightarrow MD \leftrightarrow CD

Selecting the frequency cutoff point

When a subwoofer is connected to the unit, you can select the frequency cutoff point to obtain the response you want. When shipped from the factory, the cutoff point is set to "MID."

- MID: Frequencies higher than 80 Hz are cut off.
- HIGH: Frequencies higher than 120 Hz are cut off.
- LOW: Frequencies higher than 50 Hz are cut off.

1. Press and hold SEL (select) for more than 2 seconds so that "PSM" appears on the lower part of the display.
2. Select "CUTOFF F (frequency)" with \blacktriangle or \blacktriangleleft .
3. Select the desired mode with the control dial.

The frequencies to be cut off change as follows:

MID \leftrightarrow HIGH \leftrightarrow LOW

Detaching the control panel

You can detach the control panel when leaving the car.

When detaching or attaching the control panel, be careful not to damage the connectors on the back of the control panel and on the panel holder.

How to detach the control panel

Before detaching the control panel, be sure to turn off the power.

1. Unlock the control panel.

2. Pull the control panel out of the unit.

3. Put the detached control panel into the provided case.

How to attach the control panel

1. Insert the right side of the control panel into the groove on the panel holder.

2. Press the left side of the control panel to fix it to the panel holder.

Note on cleaning the connectors:

If you frequently detach the control panel, the connectors will deteriorate. To minimize this possibility, periodically wipe the connectors with a cotton swab or cloth moistened with alcohol, being careful not to damage the connectors.

Connectors

REMOTE OPERATIONS

Before using the remote controller:

- Aim the remote controller directly at the remote sensor on the main unit. Make sure there is no obstacle in between.
- Do not expose the remote sensor to strong light (direct sunlight or artificial lighting).

Remote sensor

Installing the batteries

When the controllable range or effectiveness of the remote controller decreases, replace the batteries.

1. Remove the battery case.

- 1) Push in the direction indicated by the arrow with your right hand thumbnail.
- 2) Remove the battery case.

2. Replace the battery.

- Put the battery in the case with the + side facing upwards.

3. Return the battery case.

- Insert again the battery case pushing until you hear a clicking sound.

WARNING:

- Store the batteries in a place which children cannot reach.
- If a child accidentally swallows the battery, immediately consult a doctor.
- Do not recharge, short, disassemble or heat the batteries or dispose of in a fire.
- Doing any of these things may cause the batteries to give off heat, crack or start a fire.
- Do not leave the batteries with other metallic materials.
- Doing this may cause the batteries to give off heat, crack or start a fire.
- When throwing away or saving the batteries, wrap in tape and insulate; otherwise, it may cause the batteries to give off heat, crack or start a fire.
- Do not poke the batteries with tweezers or similar tools.
- Doing this may cause the batteries to give off heat, crack or start a fire.

Using the remote controller

- 1 Functions the same as the \odot /I/ATT button on the main unit.
- 2 Functions as the BAND button while listening to the radio (or the DAB tuner). Each time you press the button, the band changes.
- 3 Functions as the DISC + button while listening to the CD changer. Each time you press the button, the disc number increases, and the selected disc starts playing.
- 4 Functions as the PROG button while listening to a tape. Each time you press the button, the tape direction changes alternately.
- 5 Functions as the PRESET button while listening to the radio (or the DAB tuner). Each time you press the button, the preset station number increases, and the selected station is tuned in.
- 6 Functions as the DISC - button while listening to the CD changer. Each time you press the button, the disc number decreases, and the selected disc starts playing.
- 7 Functions the same as the control dial on the main unit. **Note:** This button does not function for the preferred listening mode adjustment.
- 8 Selects the source. Each time you press FUNC (function), the source changes.
- 9 Searches stations while listening to the radio.
- 10 Searches ensembles while listening to the DAB tuner.
- 11 Functions as the fast forward or rewind buttons or Multi Music Scan buttons while listening to a tape.
- 12 Fast-forwards or reverses the track if pressed and held while listening to a CD.
- 13 Skips to the beginning of the next tracks or goes back to the beginning of the current (or previous track) if pressed briefly while listening to a CD.

CD CHANGER OPERATIONS

ENGLISH

We recommend that you use one of the CH-X series (ex: CH-X1200) with your unit. If you have another CD automatic changer, consult your JVC IN-CAR ENTERTAINMENT dealer for connections.

• For example, if your CD automatic changer is one of the KD-MK series, you need a cord (KS-U15K) for connecting it to this unit.

Before operating your CD automatic changer:

- Refer also to the instructions supplied with your CD changer.
- If no discs are in the magazine of the CD changer or the discs are inserted upside down, "NO DISC" will appear on the display. If this happens, remove the magazine and set the discs correctly.
- If "RESET 1 - RESET 8" appears on the display, something is wrong with the connection between this unit and the CD changer. If this happens, check the connection, connect the connecting cord(s) firmly if necessary, then press the reset button of the CD changer.

Playing CDs

Select the CD automatic changer. Each time you press the button, you can select the CD automatic changer and the external component alternately.

CD-CH ↔ AUX

Playback starts from the first track of the first disc. All tracks of all discs are played back.

Note on One-Touch Operation:
When you press CD-CH/AUX, the power automatically comes on. You do not have to press PUSH to turn on the power.

To fast-forward or reverse the track

Press and hold FF , while playing a CD, to fast-forward the track.

Press and hold REW , while playing a CD, to reverse the track.

To go to the next tracks or the previous tracks

Press NEXT briefly, while playing a CD, to go ahead to the beginning of the next track. Each time you press the button consecutively, the beginning of the next tracks is located and played back.

Press PREV briefly, while playing a CD, to go back to the beginning of the current track. Each time you press the button consecutively, the beginning of the previous tracks is located and played back.

To go to a particular disc directly

Press the number button corresponding to the disc number to start its playback (while the CD changer is playing).

- To select a disc number from 1 - 6:
Press 1 (7) - 6 (12) briefly.
- To select a disc number from 7 - 12:
Press and hold 1 (7) - 6 (12) for more than 1 second.

Ex. When disc number 3 is selected

ENGLISH

Selecting CD playback modes

To play back tracks at random (Random Play)

Each time you press MO/RND (Mono/Random) while playing a CD, CD random play mode changes as follows:

Mode	RND Indicator	Plays at random
RND1	Lights	All tracks of the current disc, then the tracks of the next disc, and so on.
RND2	Flashes	All tracks of all discs inserted in the magazine.

To play back tracks repeatedly (Repeat Play)

Each time you press RPT/LO (Repeat/Local) while playing a CD, CD repeat play mode changes as follows:

Mode	RPT Indicator	Plays repeatedly
RPT1	Lights	The current track (or specified track).
RPT2	Flashes	All tracks of the current disc (or specified disc).

Playing a CD Text

Only when the CD changer with the CD Text function (ex. CH-X1200) is connected: In a CD Text, some information about the disc (its disc title, performer and track title) is recorded. You can show these disc information on the display.

Each time you press the button while playing a CD Text, the display changes as follows:

Notes:

- The display shows up to 8 characters at one time and scrolls if there are more than 8 characters. See also "Selecting the scroll mode" on page 32.
- Some characters or symbols will not be shown (and be blanked) on the display. (Ex. "ABC&ld#" => "ABCA D ")
- When you press DISP while playing a conventional CD, "NO NAME" appears for the disc title/performer and the track title.

EXTERNAL COMPONENT OPERATIONS

Using auxiliary players

After connecting an external component to the auxiliary input jack on the front panel, you can select the component as the sound source.

Note:
Use a stereo mini-plug cord to connect an external component to the unit.

1

Select the external component.

Each time you press the button, you can select the CD automatic changer and the external component alternately.

Note:

When selecting an external component as the source, what appears on the upper part of the display depends on the "AUX" setting (see page 32).

Note on One-Touch Operation:

When you press CD-CH/AUX, the power automatically comes on. You do not have to press PUSH to turn on the power.

2

Operate the external component.

- Refer to the instructions supplied with your external component.

Using a subwoofer

By connecting a subwoofer with the SUB WOOFER cord on the rear, enhanced bass sound can add a more realistic, theater atmosphere to your stereo system.

- Refer also to the instructions supplied with your subwoofer.

To select the frequency cutoff point, refer to "Selecting the frequency cutoff point" on page 32.

To adjust the subwoofer volume, refer to "Adjusting the sound" on page 23.

ENGLISH

DAB DAB TUNER OPERATIONS

ENGLISH

We recommend that you use DAB (Digital Audio Broadcasting) tuner KT-DB1500 with your unit.
If you have another DAB tuner, consult your JVC IN-CAR ENTERTAINMENT dealer.
• Refer also to the Instructions supplied with your DAB tuner.

What is DAB system?

DAB is one of the digital radio broadcasting systems available today. It can deliver CD quality sound without any annoying interference and signal distortion. Furthermore, it can carry text, pictures and data.
In contrast to FM broadcast, where each programme is transmitted on its own frequency, DAB combines several programmes (called "services") to form one "ensemble".
With the DAB tuner connected with this unit, you can enjoy these DAB services.

Tuning into an ensemble and one of the services

A typical ensemble has 6 or more programmes (services) broadcast at the same time. After tuning into an ensemble, you can select a service you want to listen to.

Before you start....

Press FM/AM/DAB briefly if you are selecting TAPE, CD changer or AUX as the source.

1

Select the DAB tuner.

Each time you press and hold the button for more than 1 second, the DAB tuner and the FM/AM tuner are alternately selected.

DAB ↔ FM/AM

2

Select the DAB band (DAB1, DAB2, or DAB3).
You can select any one of DAB1, DAB2, and DAB3 to tune into an ensemble.

→ DAB 1 → DAB 2 → DAB 3

Storing DAB services in memory

You can preset up to 6 DAB services in each DAB band (DAB1, DAB2 and DAB3) manually.

1

Select the DAB tuner.

Each time you press and hold the button, the DAB tuner and the FM/AM tuner are alternately selected.

DAB ↔ FM/AM

2

Select the DAB band (DAB1, DAB2, or DAB3) you want.

Each time you press the button, the DAB band changes as follows:

→ DAB 1 → DAB 2 → DAB 3

3

Tune into an ensemble you want.

4

Select a service of the ensemble you want.

3

To search ensembles of higher frequencies.
To search ensembles of lower frequencies.

Start searching an ensemble.

When an ensemble is received, searching stops.

4

Select an service you want to listen to.

To stop searching before an ensemble is received, press the same button you have pressed for searching.

To change the display information while tuning into an ensemble

Normally service name is shown on the upper part of the display.

If you want to check the ensemble name or its frequency, press DISP.

Each time you press the button, the following information appears for a while on the upper part of the display.

→ Service name → Ensemble name → Frequency

To restore the FM/AM tuner

Press and hold FM/AM/DAB for more than 1 second again.

To tune in a particular ensemble without searching:

1 Press and hold FM/AM/DAB for more than 1 second.

2 Press FM/AM/DAB repeatedly to select the DAB band (DAB1, DAB2, or DAB3).

3 Press and hold ▲▶▶ or ◀◀▼ for more than 1 second.

4 Press ▲▶▶ or ◀◀▼ repeatedly until the ensemble you want is reached.

• If you hold down the button, the frequency keeps changing until you release the button.

5

Press and hold the number button (in this example, 1) for more than 2 seconds.

Preset number and "MEMO" flashes alternately for a while.

6

Repeat the above procedure to store other DAB services into other preset numbers.

Notes:

- A previously preset DAB service is erased when a new DAB service is stored in the same preset number.
- Preset DAB services are erased when the power supply to the memory circuit is interrupted (for example, during battery replacement). If this occurs, preset the DAB services again.

ENGLISH

Tuning into a preset DAB service

You can easily tune into a preset DAB service. Remember that you must store services first. If you have not stored them yet, see pages 42 and 43.

1

Select the DAB tuner.
Each time you press and hold the button, the DAB tuner and the FM/AM tuner are alternately selected.

DAB ↔ FM/AM

2

Select the DAB band (DAB1, DAB2, or DAB3) you want.
Each time you press the button, the DAB band changes as follows:

→ DAB 1 → DAB 2 → DAB 3 →

3

Select the number (1 – 6) for the preset DAB service you want.

MAINTENANCE

To extend the lifetime of the unit

This unit requires very little attention, but you will be able to extend the life of the unit if you follow the instructions below.

To clean the heads

- Clean the heads after every 10 hours of use using a wet-type head cleaning tape (available at an audio store).
When the head becomes dirty, you may realize the following symptoms:
 - Sound quality is reduced.
 - Sound level decreases.
 - Sound drops out.
- Do not play dirty or dusty tapes.
- Do not touch the highly-polished head with any metallic or magnetic tools.

To keep the tape clean

- Always store the tapes to their storage cases after use.
- Do not store tapes in the following places:
 - Subject to direct sunlight
 - With high humidity
 - At extremely hot temperatures

CAUTIONS:

- Do not play the tapes with peeling labels; otherwise, they can damage the unit.
- Tighten tapes to remove slack since loose tape may become entangled with the mechanism.
- Do not leave a cassette in the cassette compartment after use, as the tape may become slack.

The function below is also provided to ensure the longer life of this unit.

Ignition key-off Release/ Ignition key-on play

- When you turn off the ignition key with a cassette in the compartment, the unit automatically releases the tape from its head.
- When you turn on the ignition key with a cassette in the compartment, playback automatically starts.

How to reset your unit

Press and hold both the SEL (select) and ϕ /I/ATT buttons at the same time for several seconds. This will reset the built-in microcomputer.

Note:

Your preset adjustments — such as preset channels or sound adjustments — will also be erased.

TROUBLESHOOTING

What appears to be trouble is not always serious. Check the following points before calling a service center.

Symptoms	Causes	Remedies
• A cassette tape cannot be inserted.	You have tried to insert a cassette in the wrong way.	Insert the cassette with the exposed tape facing right.
• Cassette tapes become hot.	This is not a malfunction.	
• Tape sound is at very low level and sound quality is degraded.	The tape head is dirty.	Clean it with a head cleaning tape.
• Sound is sometimes interrupted.	Connections are not good.	Check the cords and connections.
• Sound cannot be heard from the speakers.	The volume is turned to the minimum level.	Adjust it to the optimum level.
	Connections are incorrect.	Check the cords and connections.
• SSM (Strong-station Sequential Memory) automatic preset does not work.	Signals are too weak.	Store stations manually.
• Static noise while listening to the radio.	The antenna is not connected firmly.	Connect the antenna firmly.
• "NO DISC" appears on the display.	No CD is in the magazine.	Insert CDs into the magazine.
	CDs are inserted incorrectly.	Insert them correctly.
• "RESET 8" appears on the display.	This unit is not connected to a CD changer correctly.	Connect this unit and the CD changer correctly and press the reset button of the CD changer.
• "RESET 1-RESET 7" appears on the display.		Press the reset button of the CD changer.
• This unit does not work at all.	The built-in microcomputer may function incorrectly due to noise, etc.	While holding SEL, press ϕ /I/ATT for several seconds to reset the unit. (The clock setting and preset stations stored in memory are erased.) (See page 45.)

SPECIFICATIONS

AUDIO AMPLIFIER SECTION

Maximum Power Output:
Front: 40 W per channel
Rear: 40 W per channel
Continuous Power Output (RMS):
Front: 16 W per channel into 4 Ω , 40 Hz to 20,000 Hz at no more than 0.8 % total harmonic distortion.
Rear: 16 W per channel into 4 Ω , 40 Hz to 20,000 Hz at no more than 0.8 % total harmonic distortion.
Load Impedance: 4 Ω (4 Ω to 8 Ω allowance)
Tone Control Range:
Bass: \pm 10 dB at 100 Hz
Treble: \pm 10 dB at 10 kHz
Frequency Response: 40 Hz to 20,000 Hz
Signal-to-Noise Ratio: 70 dB
Line-Out Level/Impedance:
4.0 V/20 k Ω load (250 nWb/m)
Input: AUX (3.5 mm dia. stereo mini jack)

TUNER SECTION

Frequency Range:
FM: 87.5 MHz to 108.0 MHz
AM: (MW) 522 kHz to 1,620 kHz (LW) 144 kHz to 279 kHz

[FM Tuner]

Usable Sensitivity: 11.3 dBf (1.0 μ V/75 Ω)
50 dB Quietening Sensitivity:
16.3 dBf (1.8 μ V/75 Ω)
Alternate Channel Selectivity (400 kHz):
65 dB
Frequency Response: 40 Hz to 15,000 Hz
Stereo Separation: 30 dB
Capture Ratio: 1.5 dB

[MW Tuner]

Sensitivity: 20 μ V
Selectivity: 35 dB

[LW Tuner]

Sensitivity: 50 μ V

CASSETTE DECK SECTION

Wow & Flutter: 0.11% (WRMS)
Fast-Wind Time: 100 sec. (C-60)
Frequency Response (Dolby NR-OFF):
30 Hz to 18,000 Hz (Metal/CrO₂ tape)
30 Hz to 16,000 Hz (Normal tape)
Signal-to-Noise Ratio: (Normal tape)
(Dolby NR-ON): 65 dB
(Dolby NR-OFF): 56 dB
Stereo Separation: 40 dB

GENERAL

Power Requirement:
Operating Voltage: DC 14.4 V (11 V to 16 V allowance)
Allowable Operating Temperature:
0°C to +40°C
Grounding System: Negative ground
Dimensions (W x H x D)
Installation Size:
182 mm x 52 mm x 150 mm
Panel Size: 188 mm x 58 mm x 11 mm
Mass: 1.4 kg (excluding accessories)

Design and specifications subject to change without notice.

- This unit is designed to operate on 12 volts DC, NEGATIVE ground electrical systems.

INSTALLATION (IN-DASH MOUNTING)

- The following illustration shows a typical installation. However, you should make adjustments corresponding to your specific car. If you have any questions or require information regarding installation kits, consult your JVC IN-CAR ENTERTAINMENT dealer or a company supplying kits.

1 Before mounting: Press (Control Panel Release button) to detach the control panel.

2 Remove the trim plate.

3 Remove the sleeve after disengaging the sleeve locks.

① Stand the unit.

Note: When you stand the unit, be careful not to damage the fuse on the rear.

② Insert the 2 handles between the unit and the sleeve, as illustrated, to disengage the sleeve locks.

③ Remove the sleeve.

Note: Be sure to keep the handles for future use after installing the unit.

4 Install the sleeve into the dashboard.

* After the sleeve is correctly installed into the dashboard, bend the appropriate tabs to hold the sleeve firmly in place, as illustrated.

5 Fix the mounting bolt to the rear of the unit's body and place the rubber cushion over the end of the bolt.

6 Do the required electrical connections explained on the back of this instructions.

7 Slide the unit into the sleeve until it is locked.

8 Attach the trim plate so that the projection on the trim plate is fixed to the left side of the unit.

9 Attach the control panel.

DEUTSCH

- Dieses Gerät ist für einen Betrieb in elektrischen Anlagen mit 12 V Gleichstrom und (-) Erdung ausgelegt.

EINBAU (IM ARMATURENBRETT)

- Die folgende Abbildung zeigt einen typischen Einbau. Dennoch müssen Sie entsprechend Ihrem jeweiligen Auto Anpassungen vornehmen. Bei irgendwelchen Fragen oder wenn Sie Informationen hinsichtlich des Einbausatzes brauchen, wenden Sie sich an Ihren JVC Autoradiohändler oder ein Unternehmen das diese Einbausätze vertreibt.

1 Vor dem Einbau: (Schalttafel-Freigabetaste) zum Lösen der Schalttafel drücken.

2 Den Frontrahmen herausnehmen.

3 Die Halterung nach dem Entriegeln der Halterungssperren abnehmen.

① Das Gerät aufstellen.

Hinweis: Beim Aufstellen des Geräts darauf achten, daß die Sicherung auf der Rückseite nicht beschädigt wird.

② Die beiden Griffe zwischen dem Gerät und der Halterung wie abgebildet einstecken und die Halterungssperren entriegeln.

③ Die Halterung entfernen.

Hinweis: Sicherstellen, daß die Griffe für künftigen Gebrauch nach dem Einbau des Geräts aufbewahrt werden.

4 Die Halterung im Armaturenbrett einbauen.

* Nach dem korrekten Einbau der Halterung im Armaturenbrett, die entsprechenden Riegel umknicken, um die Halterung an ihrem Platz zu sichern, siehe Abbildung.

5 Die Befestigungsschraube an der Rückseite des Gerätekörpers befestigen und das Ende der Schraube mit einem Gummipuffer abdecken.

6 Die elektrischen Verbindungen wie umseitig in dieser Anleitung erklärt ausführen.

7 Das Gerät in die Halterung schieben, bis es einrastet.

8 Befestigen Sie die Frontrahmen in der Form, daß der Fortsatz der Frontrahmen auf der linken Seite des Geräts befestigt wird.

9 Die Schalttafel anbringen.

FRANÇAIS

- Cet appareil est conçu pour fonctionner sur des sources de courant continu de 12 volts à masse NEGATIVE.

INSTALLATION (MONTAGE DANS LE TABLEAU DE BORD)

- L'illustration suivante est un exemple d'installation typique. Cependant, vous devez faire les ajustements correspondant à votre voiture particulière. Si vous avez des questions ou avez besoin d'information sur des kits d'installation, consulter votre revendeur d'autoradios JVC ou une compagnie d'approvisionnement.

1 Avant le montage: Appuyer sur (touche de libération du panneau de commande) pour détacher le panneau de commande.

2 Retirer la plaque d'assemblage.

3 Libérer les verrous du manchon et retirer le manchon.

① Poser l'appareil à la verticale.

Remarque: Lorsque vous mettez l'appareil à la verticale, faire attention de ne pas endommager le fusible situé sur le fond.

② Insérer les 2 poignées entre l'appareil et le manchon comme indiqué pour désengager les verrous de manchon.

③ Retirer le manchon.

Remarque: S'assurer de garder les poignées pour une utilisation ultérieure, après l'installation de l'appareil.

4 Installer le manchon dans le tableau de bord.

* Après installation correcte du manchon dans le tableau de bord, plier les bonnes pattes pour maintenir fermement le manchon en place, comme montré.

5 Monter le boulon de montage sur l'arrière du corps de l'appareil puis passer l'amortisseur en caoutchouc sur l'extrémité du boulon.

6 Réaliser les connexions électriques expliquées au dos de cette page.

7 Faire glisser l'appareil dans le manchon jusqu'à ce qu'il soit verrouillé.

8 Attachez la plaque d'assemblage de façon que la projection de la plaque soit fixée sur le côté gauche de l'appareil.

9 Remonter le panneau de commande.

TROUBLESHOOTING

- The fuse blows.**
 - Are the red and black leads connected correctly?
- Power cannot be turned on.**
 - Is the yellow lead connected?
- No sound from the speakers.**
 - Is the speaker output lead short-circuited?
- Sound is distorted.**
 - Is the speaker output lead grounded?
 - Are the "-" terminals of L and R speakers grounded in common?
- Unit becomes hot.**
 - Is the speaker output lead grounded?
 - Are the "-" terminals of L and R speakers grounded in common?

FEHLERSUCHE

- Die Sicherung brennt durch.**
 - Sind die roten und schwarzen Leitungen richtig angeschlossen?
- Stromversorgung kann nicht eingeschaltet werden.**
 - Ist die gelbe Leitung angeschlossen?
- Kein Ton aus den Lautsprechern.**
 - Ist die Lautsprecherausgangsleitung kurzgeschlossen?
- Ton verzerrt.**
 - Ist die Lautsprecherausgangsleitung geerdet?
 - Sind die (-) Anschlußklemmen der linken und rechten Lautsprecher zusammen geerdet?
- Gerät wird heiß.**
 - Ist die Lautsprecherausgangsleitung geerdet?
 - Sind die (-) Anschlußklemmen der linken und rechten Lautsprecher zusammen geerdet?

EN CAS DE DIFFICULTÉS

- Le fusible saute.**
 - Les fils rouge et noir sont-ils raccordés correctement?
- L'appareil ne peut pas être mis sous tension.**
 - Le fil jaune est-il raccordé?
- Pas de son des haut-parleurs.**
 - Le fil de sortie de haut-parleur est-il court-circuité?
- Le son est déformé.**
 - Le fil de sortie de haut-parleur est-il à la masse?
 - Les bornes "-" des haut-parleurs gauche et droit sont-elles mises ensemble à la masse?
- L'appareil devient chaud.**
 - Le fil de sortie de haut-parleur est-il à la masse?
 - Les bornes "-" des haut-parleurs gauche et droit sont-elles mises ensemble à la masse?

- When using the optional stay
- Beim Verwenden der Anker-Option
- Lors de l'utilisation du hauban en option

- When installing the unit without using the sleeve
- Beim Einbau des Geräts ohne Halterung
- Lors de l'installation de l'appareil sans utiliser de manchon

In a Toyota for example, first remove the car radio and install the unit in its place.
Zum Beispiel in einem Toyota zuerst das Autoradio ausbauen und dann das Gerät an seinem Platz einbauen.
Par exemple dans une Toyota, retirer d'abord l'autoradio et installer l'appareil à la place.

Flat type screws (M5 x 6 mm)*
Senkkopfschrauben (M5 x 6 mm)*
Vis à tête plate (M5 x 6 mm)*

* Not included with this unit.
* Nicht Teil dieses Geräts.
* Non fourni avec cet appareil.

Note: When installing the unit on the mounting bracket, make sure to use the 6 mm-long screws. If longer screws are used, they could damage the unit.

Hinweis: Beim Anbringen des Gerät an der Konsole sicherstellen, daß 6 mm lange Schrauben verwendet werden. Werden längere Schrauben verwendet, können sie das Gerät beschädigen.

Remarque: Lors de l'installation de l'appareil sur le support de montage, s'assurer d'utiliser des vis d'une longueur de 6 mm. Si des vis plus longues sont utilisées, elles peuvent endommager l'appareil.

Removing the unit

- Before removing the unit, release the rear section.
- 1 Remove the control panel.
- 2 Remove the trim plate.
- 3 Insert the 2 handles into the slots, as shown. Then, while gently pulling the handles away from each other, slide out the unit. (Be sure to keep the handles after installing it.)

Ausbau des Geräts

- Vor dem Ausbau des Geräts den hinteren Teil freigeben.
- 1 Die Schalttafel abnehmen.
- 2 Den Frontrahmen abnehmen.
- 3 Die 2 Griffe in die Schlitzte wie gezeigt stecken. Dann die Griffe behutsam auseinander ziehen und das Gerät herausziehen. (Die Griffe nach dem Einbau auf jeden Fall aufbewahren.)

Retrait de l'appareil

- Avant de retirer l'appareil, libérer la section arrière.
- 1 Retirer le panneau de commande.
- 2 Retirer la plaque d'assemblage.
- 3 Introduire les deux poignées dans les fentes, comme montré. Puis, tout en tirant doucement les poignées écartées, faire glisser l'appareil pour le sortir. (S'assurer de conserver les poignées après l'installation de l'appareil.)

Parts list for installation and connection

The following parts are provided with this unit.
After checking them, please set them correctly.

Teiliste für den Einbau und Anschluß

Die folgenden Teile werden zusammen mit diesem Gerät geliefert.
Nach ihrer Überprüfung, die Teile richtig einsetzen.

Liste des pièces pour l'installation et raccordement

Les pièces suivantes sont fournies avec cet appareil.
Après vérification, veuillez les placer correctement.

ENGLISH

ELECTRICAL CONNECTIONS

To prevent short circuits, we recommend that you disconnect the battery's negative terminal and make all electrical connections before installing the unit. If you are not sure how to install this unit correctly, have it installed by a qualified technician.

Note:

This unit is designed to operate on 12 volts DC, NEGATIVE ground electrical systems. If your vehicle does not have this system, a voltage inverter is required, which can be purchased at JVC IN-CAR ENTERTAINMENT dealers.

- Replace the fuse with one of the specified rating. If the fuse blows frequently, consult your JVC IN-CAR ENTERTAINMENT dealer.
- If noise is a problem...
- This unit incorporates a noise filter in the power circuit. However, with some vehicles, clicking or other unwanted noise may occur. If this happens, connect the unit's rear ground terminal (See connection diagram.) to the car's chassis using shorter and thicker cords, such as copper braiding or gauge wire. If noise still persists, consult your JVC IN-CAR ENTERTAINMENT dealer.
- Maximum input of the speakers should be more than 40 watts at the rear and 40 watts at the front, with an impedance of 4 to 8 ohms.
- Be sure to ground this unit to the car's chassis.
- The heat sink becomes very hot after use. Be careful not to touch it when removing this unit.

DEUTSCH

ELEKTRISCHE ANSCHLÜSSE

Zur Vermeidung von Kurzschlüssen empfehlen wir, daß Sie den negativen Batterieanschluß abtrennen und alle elektrischen Anschlüsse herstellen, bevor das Gerät eingebaut wird. Sind Sie sich über den richtigen Einbau des Geräts nicht sicher, lassen Sie es von einem qualifizierten Techniker einbauen.

Hinweis:

Dieses Gerät ist für den Betrieb in elektrischen Anlagen mit 12 V Gleichstrom und (-) Erdung ausgelegt. Verfügt Ihr Fahrzeug nicht über diese Anlage, ist ein Spannungsinverter erforderlich, der bei JVC Autoradiohändler erworben werden kann.

- Die Sicherung mit einer der entsprechenden Nennleistung ersetzen. Brennt die Sicherung häufig durch, wenden Sie sich an ihren JVC Autoradiohändler.
- Sind Störgeräusche ein Problem...
- Dieses Gerät enthält ein Störfilter im Stromkreis. Bei manchen Fahrzeugen kann jedoch ein Klicken oder andere unerwünschte Störgeräusche auftreten. Sollte das der Fall sein, die hintere Erdungsanschlussschleife (siehe Schaltplan) des Geräts am Fahrwerk des Fahrzeugs anschließen, dabei kürzere und dickere Kabel wie beispielsweise Kupfergeflechtstrahndrht oder Stahldraht verwenden. Bleibt Störgeräusch bestehen, wenden Sie sich an Ihren JVC Autoradiohändler.
- Maximale Eingangsleistung der Lautsprecher muß höher als 40 W hinten und 40 W vorne sein, mit einer Impedanz von 4 bis 8 Ohm.
- Sicherstellen, daß das Gerät am Fahrwerk geerdet wird.
- Das Abstrahlblech wird nach dem Gebrauch sehr heiß. Beim Ausbau des Geräts darauf achten, das Abstrahlblech nicht zu berühren.

FRANÇAIS

RACCORDEMENTS ELECTRIQUES

Pour éviter tout court-circuit, nous vous recommandons de débrancher la borne négative de la batterie et d'effectuer tous les raccordements électriques avant d'installer l'appareil. Si l'on n'est pas sûr de pouvoir installer correctement cet appareil, le faire installer par un technicien qualifié.

Remarque:

Cet appareil est conçu pour fonctionner sur des sources de courant continu de 12 volts à masse NEGATIVE. Si votre véhicule n'offre pas ce type d'alimentation, il vous faut un convertisseur de tension, que vous pouvez acheter chez un revendeur d'autoradios JVC.

- Remplacer le fusible par un de la valeur précisée. Si le fusible saute souvent, consulter votre revendeur d'autoradios JVC.
- Si le bruit est un problème...
- Cet appareil incorpore un filtre de bruit dans le circuit d'alimentation. Cependant, avec certains véhicules, quelques claquements ou autres bruits non désirés risquent de se produire. Si cela arrive, raccorder la borne de masse arrière de l'appareil au châssis de la voiture (voir le schéma de raccordement) en utilisant des cordons les plus gros et les plus courts possibles telle qu'une barre de cuivre ou une tresse. Si le bruit persiste, consulter votre revendeur d'autoradios JVC.
- La puissance admissible des haut-parleurs doit être supérieure à 40 watts à l'arrière et à 40 watts l'avant, avec une impédance de 4 à 8 ohms.
- S'assurer de raccorder la mise à la masse de cet appareil au châssis de la voiture.
- Le radiateur devient très chaud après usage. Faire attention de ne pas le toucher en retirant cet appareil.

A Typical Connections / Typische Anschlüsse / Raccordements typiques

Before connecting: Check the wiring in the vehicle carefully. Incorrect connection may cause serious damage to this unit.

1 Connect the colored leads of the power cord to the car battery, speakers and power aerial (if any) in the following sequence.

- ① Black: ground
- ② Yellow: to car battery (constant 12V)
- ③ Red: to an accessory terminal
- ④ Others: to speakers
- ⑤ Blue with white stripe: to power aerial (200mA max.)
- ⑥ Orange with white stripe: to car light control switch
- ⑦ Brown: to cellular phone system (For details, refer to the instructions of the cellular phone.)

2 Connect the aerial cord.

3 Finally connect the wiring harness to the unit.

Note: If your vehicle does not have any accessory terminal, move the fuse from the fuse position 1 (initial position) to fuse position 2, and connect the red lead (A7) to the positive (+) battery terminal.

• The yellow lead (A4) is not used in this case.

Vor dem Anschließen: Die Verdrahtung im Fahrzeug sorgfältig überprüfen. Falsche Anschlüsse können ernsthafte Schäden am Gerät hervorrufen.

1 Die farbigen Leitungen des Spannungsversorgungskabels an der Autobatterie, den Lautsprechern und dem Motorantenne (sofern vorhanden) in folgender Reihenfolge anschließen.

- ① Schwarz: Erdung
- ② Gelb: an Autobatterie (konstant 12 V)
- ③ Rot: an Zubehöranschlussschleife
- ④ Andere: an Lautsprecher
- ⑤ Blau mit weißem Streifen: an Motorantenne (max. 200 mA)
- ⑥ Orange mit weißem Streifen: an Autolichtschalter
- ⑦ Braun: an Mobiltelefon (Weitere Informationen entnehmen Sie bitte der Bedienungsanleitung des Mobiltelefons.)

2 Das Antennenkabel anschließen.

3 Die Kabelbäume am Gerät anschließen.

Hinweis: Verfügt Ihr Fahrzeug nicht über eine Zubehöranschlussschleife, die Sicherung von der 1. Sicherungsposition (Erstposition) in die 2. Sicherungsposition versetzen, die rote Leitung (A7) an der (+) Batterieanschlussschleife anschließen.

• Die gelbe Leitung (A4) wird in diesem Fall nicht verwendet.

Avant de commencer la connexion: vérifiez attentivement le câblage du véhicule. Une connexion incorrecte peut endommager sérieusement l'appareil.

1 Connectez les fils de couleur du cordon d'alimentation à la batterie de la voiture, aux enceintes et à l'antenne automatique (s'il y en a une) dans l'ordre suivant.

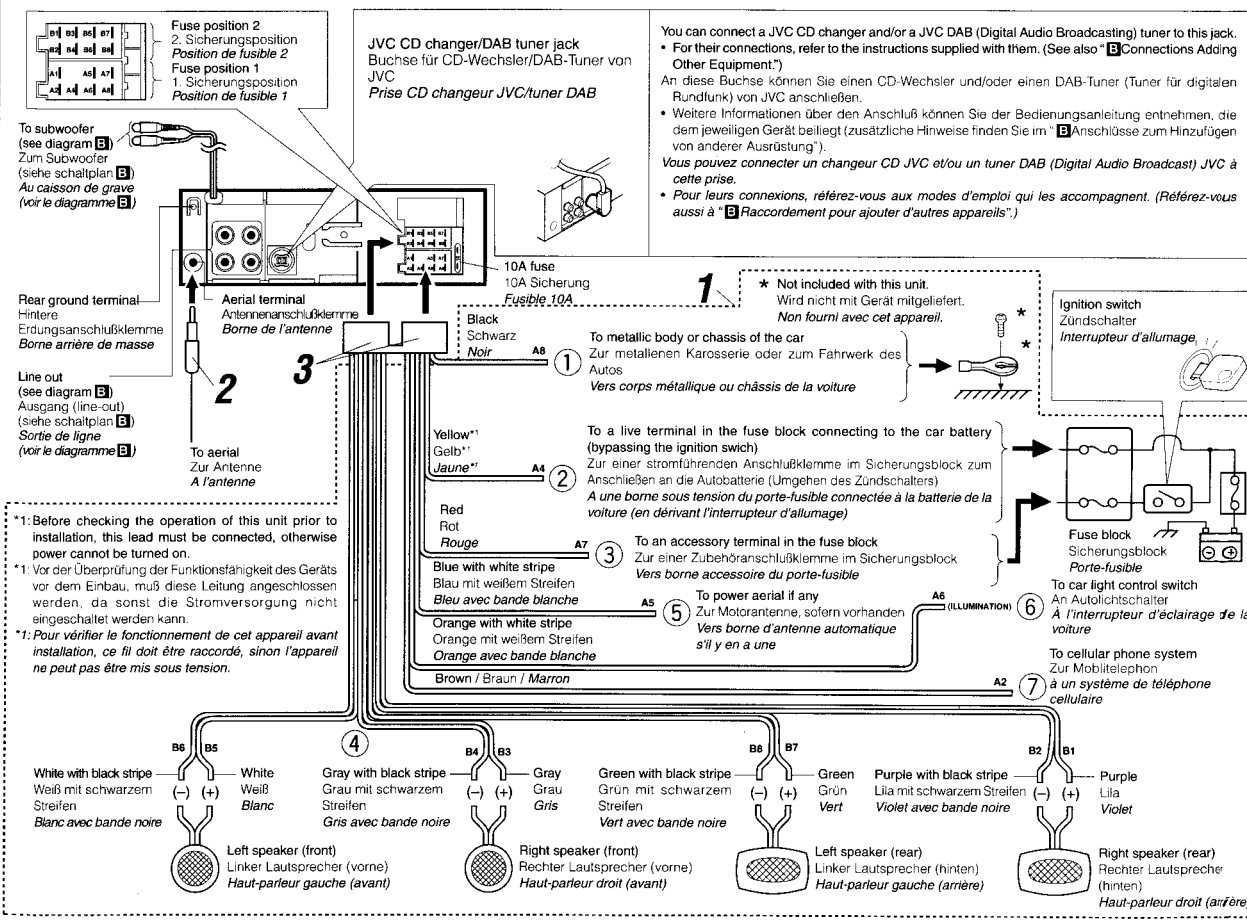

- ① Noir: à la masse
- ② Jaune: à la batterie de la voiture (12V constant)
- ③ Rouge: à la prise accessoire
- ④ Autres: aux enceintes
- ⑤ Bleu à bandes blanches: à l'antenne automatique (200 mA max.)
- ⑥ Orange à bandes blanches: à l'interrupteur d'éclairage de la voiture
- ⑦ Marron: à un système de téléphone cellulaire (Pour les détails, se référer aux instructions du téléphone cellulaire.)

2 Connectez le cordon d'antenne.

3 Finalement, connectez le faisceau de fils à l'appareil.

Remarque: Si votre véhicule ne possède pas de borne accessoire, déplacez le fusible de la position de fusible 1 (position originale) à la position de fusible 2 et connectez le fil rouge (A7) à la borne positive (+) de la batterie.

• Le fil jaune (A4) n'est pas utilisé dans ce cas.

PRECAUTIONS on power supply and speaker connections:

- DO NOT connect the speaker leads of the power cord to the car battery; otherwise, the unit will be seriously damaged.
- Connect the black lead (ground), yellow lead (to car battery, constant 12V), and red lead (to an accessory terminal) correctly.
- BEFORE connecting the speaker leads of the power cord to the speakers, check the speaker wiring in your car.
 - If the speaker wiring in your car is as illustrated in Fig. 1 and Fig. 2 below, DO NOT connect the unit using that original speaker wiring. If you do, the unit will be seriously damaged. Redo the speaker wiring so that you can connect the unit to the speakers as illustrated in Fig. 3.
 - If the speaker wiring in your car is as illustrated in Fig. 3, you can connect the unit using the original speaker wiring in your car.
 - If you are not sure of the speaker wiring of your car, consult your car dealer.

Fig. 1

Fig. 2

Fig. 3

VORSICHTSMASSEN beim Anschließen der Stromversorgung und Lautsprecher:

- Die Lautsprecherleitungen des Netzkabels NICHT an der Autobatterie anschließen, da sonst das Gerät schwer beschädigt wird.
- Die schwarze Leitung (Erdung), die gelbe Leitung (zur Autobatterie, konstant 12 V) und die rote Leitung (zur Zubehöranschlussschleife) richtig anschließen.
- VOR dem Anschließen der Lautsprecherleitungen des Spannungsversorgungskabels an die Lautsprecher, die Lautsprecherverdrahtung in Ihrem Auto überprüfen.
 - Ist die Lautsprecherverdrahtung wie unten in "Fig. 1" und "Fig. 2" abgebildet, das Gerät NICHT mit der Originalverdrahtung der Lautsprecher anschließen, da sonst das Gerät schwer beschädigt wird. Die Lautsprecherverdrahtung erneuern, so daß Sie das Gerät an den Lautsprechern wie in "Fig. 3" abgebildet anschließen können.
 - Ist die Lautsprecherverdrahtung in Ihrem Auto wie in "Fig. 3" abgebildet, können Sie das Gerät mit der Originalverdrahtung der Lautsprecher in Ihrem Auto anschließen.
 - Sind Sie sich über die Lautsprecherverdrahtung in Ihrem Auto nicht sicher, wenden Sie sich an Ihren Autohändler.

PRECAUTIONS sur l'alimentation et la connexion des enceintes:

- NE CONNECTEZ PAS les fils d'enceintes du cordon d'alimentation à la batterie; sinon, l'appareil serait sérieusement endommagé.
- Connectez correctement le fil noir (à la masse), le fil jaune (à la batterie de la voiture, 12V constant) et le fil rouge (à la prise accessoire).
- AVANT de connecter les fils d'enceintes du cordon d'alimentation aux enceintes, vérifiez le câblage des enceintes de votre voiture.
 - Si le câblage des enceintes de votre voiture est réalisé comme montré sur la Fig. 1 ou Fig. 2 ci-dessus, NE CONNECTEZ PAS l'appareil en utilisant ce câblage original d'enceintes. Si vous le faites, l'appareil sera sérieusement endommagé. Recommencez le câblage des enceintes de façon que vous puissiez connecter l'appareil aux enceintes comme montré sur la Fig. 3.
 - Si le câblage des enceintes de votre voiture est comme montré sur la Fig. 3, vous pouvez connecter l'appareil en utilisant ce câblage original d'enceintes pour votre voiture.
 - Si vous n'êtes pas sûrs du câblage d'enceintes de votre voiture, consultez le concessionnaire de votre voiture.

Connecting the leads / Anschließen der Leitungen / Raccordement des fils

Twist the core wires when connecting.
Die Kerndrähte beim Anschließen verdrehen.
Torsader les âmes des fils en les raccordant.

Solder the core wires to connect them securely.
Die Kerndrähte anlöten, um sie fest anzuschließen.
Soudier les âmes des fils pour les raccorder entre eux de façon sûre.

CAUTION / VORSICHT/ PRECAUTION:

- To prevent short-circuit, cover the terminals of the UNUSED leads with insulating tape.
- Zur Vermeidung eines Kurzschlusses die Anschlußklemmen der NICHT VERWENDETEN Leitungen mit Isolierklebeband umwickeln.
- Pour éviter les court-circuits, couvrir les bornes des fils qui ne sont PAS utilisés avec de la bande isolante

B Connections Adding Other Equipment / Anschlüsse zum Hinzufügen von anderer Ausrüstung / Raccordement pour ajouter d'autres appareils

You can connect an amplifier and other equipment to upgrade your car stereo system.

- Connect the remote lead (blue with white stripe) to the remote lead of the other equipment so that it can be controlled through this unit.
- For amplifier only:
 - Connect this unit's line-out terminals to the amplifier's line-in terminals.
 - Disconnect the speakers from this unit, connect them to the amplifier. Leave the speaker leads of this unit unused. (Cover the terminals of these unused leads with insulating tape, as illustrated above.)
- For subwoofer only:
 - Connect this unit's SUB WOOFER plugs to the amplifier's line-in jacks.

Sie können einen Verstärker oder ein anderes Gerät anschließen, um Ihre Autostereoanlage zu erweitern.

- Schließen Sie das Fernbedienungskabel (blau mit weißem Streifen) an das Fernbedienungskabel des anderen Geräts an, so daß es über dieses Gerät gesteuert werden kann.
- Nur für den Verstärker:
 - Die Anschlußklemmen am Ausgang (line-out) dieses Gerät an den Anschlußklemmen des Ausgangs (line-out) des Verstärkers anschließen.
 - Die Lautsprecher von diesem Gerät abtrennen und am Verstärker anschließen. Die Lautsprecherleitungen dieses Geräts unbenutzt lassen. (Die Anschlußklemmen dieser nicht verwendeten Leitungen mit Isolierband umwickeln, siehe Abb. oben.)
- Nur für den Subwoofer:
 - Die Stecker SUB WOOFER des Geräts an die Line-In-Buchsen am Verstärker anschließen.

Vous pouvez connecter un amplificateur ou autre appareil pour améliorer votre système autoradio.

- Connectez le fil de commande à distance (bleu avec bande blanche) au fil de commande à distance de l'autre appareil de façon qu'il puisse être commandé via cet appareil.
- Pour l'amplificateur seulement:
 - Raccorder les bornes de sortie ligne de cet appareil aux bornes d'entrée ligne de l'amplificateur.
 - Déconnectez les enceintes de cet appareil et connectez-les à l'amplificateur. Laissez les fils d'enceintes de cet appareil inutilisés. (Recouvrir les extrémités de ces fils inutilisés avec de la bande isolante comme montré ci-dessus.)
- Pour le caisson de grave seulement:
 - Connectez les fiches SUBWOOFER de cet appareil aux prises d'entrée de ligne de l'amplificateur.

Amplifier / Verstärker / Amplificateur

The line output level of this unit is kept high to maintain the hi-fi sounds reproduced from this unit.

When connecting an external amplifier to this unit, turn down the gain control on the external amplifier to obtain the best performance from this unit.

Der Ausgangspegel dieses Geräts wird auf einem hohen Wert gehalten, um den Hi-Fi-Klang zu unterstützen, den dieses Gerät reproduziert.

Wenn Sie einen externen Verstärker an dieses Gerät anschließen, stellen Sie den Verstärkungsregler des externen Verstärkers herunter, um die bestmögliche Leistung dieses Geräts zu erzielen.

Le niveau de sortie de ligne de cet appareil est maintenu à un niveau élevé pour maintenir une qualité Hi-Fi pour les sons reproduits par cet appareil.

Lors de la connexion d'un amplificateur extérieur à cet appareil, diminuez le réglage du gain sur l'amplificateur extérieur pour obtenir les meilleures performances de cet appareil.

CD changer and DAB tuner / CD-Wechsler und DAB-Tuner / Changeur CD et tuner DAB

You can connect a JVC CD changer and/or a JVC DAB (Digital Audio Broadcasting) tuner.

- For their connections, refer to the instructions supplied with them.

Sie können einen CD-Wechsler und/oder einen DAB-Tuner (Tuner für digitalen Rundfunk) von JVC anschließen.

- Weitere Informationen über den Anschluß können Sie der Bedienungsanleitung entnehmen, die dem jeweiligen Gerät beiliegt.

Vous pouvez connecter un changeur CD JVC et/ou un tuner DAB (Digital Audio Broadcast) JVC.

- Pour leurs connexions, référez-vous aux modes d'emploi qui les accompagnent.

Connecting cord supplied with your DAB tuner

Verbindungskabel, das zum Lieferumfang des DAB-Tuners gehört

Cordon de connexion fourni avec votre tuner DAB

Connecting cord supplied with your CD changer

Verbindungskabel, das zum Lieferumfang des CD-Wechslers gehört

Cordon de connexion fourni avec votre changeur CD

- You can connect both components in series as illustrated above.
- Es ist möglich, beide Komponenten in einer Serienschaltung entsprechend der obigen Darstellung anzuschließen.
- Vous pouvez connecter les deux appareils en série comme montré ci-dessus.

- CAUTION / VORSICHT/ PRECAUTION:
- Before connecting the CD changer and/or the DAB tuner, make sure that the unit is turned off.
- Bevor Sie den CD-Wechsler und/oder den DAB-Tuner anschließen, vergewissern Sie sich, daß das Gerät ausgeschaltet ist.
- Avant de connecter le changeur CD et/ou le tuner DAB, s'assurer que l'unité est éteinte.

Subwoofer / Subwoofer / Caisson de grave

You can connect a subwoofer to reinforce the bass.

- For their connections, refer to the instructions supplied with your subwoofer.

Sie können einen Subwoofer anschließen, um den Baß zu verstärken.

- Weitere Informationen über den Anschluß entnehmen Sie bitte der Bedienungsanleitung des Subwoofers.

Vous pouvez connecter un caisson de grave pour renforcer les graves.

- Pour la connexion, référez-vous aux instructions fournies avec le caisson de grave.

Subwoofer plug protective caps/
Schutzkappen des Subwoofers/
Capuchons de protection du caisson de grave

Remove the protective caps only when connecting a subwoofer.

Nehmen Sie die Schutzkappen nur ab, wenn Sie einen Subwoofer anschließen.

Retirez les capuchons protecteurs uniquement lors de la connexion d'un caisson de grave.

Disassembly method

■ Removing the front panel unit

1. Press the Eject button to open the front panel unit
(See fig 1)
2. Push and open the right and left open/close shaft arms outward to remove the shaft. (See fig 2)
3. Remove the front panel unit from the same side as the shaft was removed.

■ Removing the front chassis assembly

1. Remove the front panel unit.
2. Remove the two screws **A** securing the front chassis assembly. (See fig 3)
3. Remove the four ribs **a** securing the front chassis assembly to the chassis. (See fig 4)

■ Removing the bottom cover assembly

- Turn the unit upside down, then insert **a** and turn to **b** the screwdriver to remove the bottom cover.
(See fig 5)

Fig 5

■ Removing the main board(wiht rear panel) (See fig6.7)

- 1.Remove two screws **E** retaining the rear panel to the chassis
- 2.Remove one screw **C** retaining the IC to the heat sink.
- 3.Remove two screws **D** retaining the main bord.
- 4.Lift up the main board to remove it. At this time,remove the connector CP501 connecting the main board and Cassette mechanism.
- 5.Remove two screws **B** to remove the heat sink.

Fig 6

Fig 7

■ Removing the rear brackt (See fig7)

- 1.Remove one screw **I** to remove the IC bracket.
- 2.Remove one screw **F** to remove the line-out jack.
- 3.Remove one screw **G** to remove the antenna jack.
- 4.Remove one screw **H** to remove the connector.

■ Cassette mechanism assembly (See fig8)

Remove four mechanism mounting screws **J** retaining the top cover.

■ Front panel unit (See fig9)

Remove six screws **K** retaining the rear cover.

Fig 8

Fig 9

" Cassette Mechanism Sections "

■ Removing the Head Relay Board (See Fig. 1)

1. Resolder the lead wires of the loading motor at the two positions shown (RED, BLACK).
2. Resolder the lead wires of the head at the three positions shown (RED, YELLOW, BLACK).
3. Remove the three screws A securing the head relay board.
4. Shift the interlocking section a securing the head relay board in the direction shown by the arrow 1. to remove the printed circuit board.

Fig. 1

■ Removing the Load Arm Assembly (See Fig. 2)

1. Using tweezers, detach the mylar washer b securing the load arm assembly and pull out the load arm assembly.

Note : When reassembling, be sure to use a new mylar washer.

2. Shift the load arm assembly counterclockwise.
3. Remove the load arm assembly from the catch (K).

Fig. 2

■ Removing the Cassette Holder and Holder Arm Assembly (See Fig. 3)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Apply DC 6V to the lead wire of the loading motor assembly and turn the load gear assembly to the position shown in Fig. 3.
4. Remove the screw B securing the cassette holder and holder arm assembly.
5. Shift the cassette holder and the holder arm assembly in the direction shown by the arrow 2. and remove them from the interlocking section c of the sub chassis assembly.

■ Removing the Sub Chassis Assembly (See Fig. 3)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Removing the cassette holder and holder arm assembly.
4. Remove the cassette holder and holder arm assembly.
5. Remove the two screws (C . D) securing the sub chassis assembly.

Note : When removing the sub chassis assembly, the mode gear may become detached. In this case, set it back to the original position.

Fig. 3

■ **Removing the Playback Head (See Fig. 4)**

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Removing the cassette holder and holder arm assembly.
4. Removing the sub chassis assembly.
5. Disengage the spring holding the playback head down.
6. Remove the two screws E securing the playback head.

Fig. 4

■ **Removing the Pinch Roller Assembly (See Fig. 5,6)**

1. Removing the head relay board.
 2. Removing the load arm assembly.
 3. Removing the cassette holder and holder arm assembly.
 4. Removing the sub chassis assembly.
 5. Detach the mylar washers d at the two positions securing the right and left pinch roller assemblies.
- Note : When reassembling, be sure to use new mylar washers.
Also, make sure that grease is not adhering to the pinch rollers.
6. Pull out the pinch rollers.

Fig. 5

Fig. 6

■ **Removing the Reel Disk Assembly (See Fig. 7)**

1. Removing the head relay board.
 2. Removing the load arm assembly.
 3. Removing the cassette holder and holder arm assembly.
 4. Removing the sub chassis assembly.
 5. Detach the mylar washer e from the tip by first pressing down the reel driver to expose it.
- Note : When reassembling, be sure to use a new mylar washer.

Fig. 7

■ Removing the Head Plate (See Fig. 8,9)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Removing the cassette holder and holder arm assembly.
4. Removing the sub chassis assembly.
5. Removing the left and right pinch roller assembly.
6. From the rear of the head plate, detach the mylar washer *f* and washer pressing the forward/reverse plate down.
7. Remove the two screws *F* fixing the metal detection lever and removal spring as shown in Fig. 8.
8. Remove the head plate.
9. Pull out the mode gear.

Note : When installing the mode gear, set it to the arrow mark.

Fig. 8

■ Removing the Flywheel Assembly (See Fig. 9)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Removing the cassette holder and holder arm assembly.
4. Removing the sub chassis assembly.
5. Removing the Head Plate.
6. Disengage the main belt from the flywheel assembly.
7. Remove the E.washer *g* at the two positions which secure the capstan shaft away from the surface.
8. Pull out the flywheel assembly from the rear.

Fig. 9

■ Removing the Reel Disk Board (See Fig. 10)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Removing the cassette holder and holder arm assembly.
4. Removing the sub chassis assembly.
5. Straighten the curved tab *h* from the tip by first pressing down the reel feather to expose it.
6. Remove the two screws *G* fixing the reel disk board.
7. Remove the reel disk board.

Fig. 10

■ Removing the Loading Motor Assembly (See Fig. 11)

1. Removing the head relay board.
2. Removing the load arm assembly.
3. Remove the mylar washer *i* fixing the worm gear.
Note : When reassembling, be sure to use a new mylar washer.
4. Remove the one screw *H* fixing the loading motor assembly.
5. Remove the two screws *I* fixing the motor bracket.

Fig. 11

■ Removing the Flywheel Assembly (See Fig. 12)

1. Insert the mode gear into the sub chassis assembly.
2. Install the sub chassis assembly and secure it with the two screws *C* and *D* as shown in.
- Note : The set arm assembly and the mode gear should be positioned as shown in Fig. 12.

Fig. 12

3. Attach the cassette holder as shown in Fig. 13.
In the case, first pass the tab of the section *j* through the mechanism *k*, then attach the cassette holder in the direction shown by arrow.

Fig. 13

4. Set the catch (K) to the holder arm assembly as shown in Fig. 14.

Fig. 14

5. While attaching the holder arm assembly to the cassette holder, insert the shaft of the holder arm assembly into the interlocking section c of the sub chassis assembly as shown in Fig. 15.
6. Install the spring attached to the holder arm assembly shaft over the set arm assembly as shown in Fig. 16.
7. After the holder arm assembly is installed, secure it with the screw B (See Fig. 15)

Fig. 16

Fig. 15

8. After the installation , apply DC6V to the lead wires of the loading motor assembly to locate the load gear assembly as shown in Fig. 17.
9. Install the load arm assembly.
10. Install the head relay board..

Note : Install it so that the slide switch lever of the head relay board is set in the printed circuit board stay hook of the sub chassis assembly. (See Fig. 18)

Fig. 18

Fig. 17

11. Solder the loading motor and head lead wires to the head relay board, respectively. (See Fig. 19)

Fig. 19

Adjustment method

■Test Instruments required for adjustment

- 1.Digital oscilloscope(100MHz)
- 2.Frequency Counter meter
- 3.Electric voltmeter
- 4.Wow & flutter meter
- 5.Test Tapes
 - VT724 ----- for DOLBY level measurement
 - VT739 ----- For playback frequency measurement
 - VT712 ---- For wow flutter & tape speed measurement
 - VT703 ----- For head azimuth measurement
- 6.Torque gauge ----- Cassette type for CTG-N
(mechanism adjustment)

■Measuring conditions(Amplifier section)

Power supply voltage ----- DC14.4V(10.5~16V)
 Load impedance ----- 4Ω (2Speakers connection)
 Line out ----- $20k\Omega$

■Standard volume position

Balance and Bass,Treble volume .Fader

:Center(Indication"0")

Loudness,Dolby NR,Sound,Cruise:Off

Volume position is about 2V at speaker output with following conditions.Playback the test tape VT721.

AM mode 999kHz/62dB,INT/400Hz,30%
 modulation signal on receiving.

FM mono mode 97.9MHz/66dB,INT/400Hz,22.5kHz
 deviation pilot off mono

FM stereo mode 1kHz,67.5kHz dev. pilot 7.5kHz dev.

Output level 0dB(1 μ V, 50 Ω /open terminal)

■Tuner section

BAND STEP

FM : 100kHz (Seek), 50kHz (Manual)

AM : 9kHz step

■Preset Memory Initialization

Band	Preset Memory					
	M1	M2	M3	M4	M5	M6
FM(MHz)	87.5	89.9	97.9	105.9	108.0	87.5
AM(kHz)	153	216	603	999	1404	1620

DUMMY LOAD

Exclusive dummy load should be used for AM and FM dummy load,there is a loss of 6dB between SSG output and antenna input. The loss of 6dB need not be considered since direct reading of figures are applied in this working standard.

■Arrangement of Adjusting

Cassette Mechanism Section

■ Arrangement of adjusting

Head amplifier board section

■ Information for using a Car Stereo service jig (for adjustment and checking)

- We are advancing efforts to make our extension cords common for all Car Stereo products. Please use this type of extension cord as follows.
- As a U-shape type top cover is employed, this type of extension cord needed to check operation of the mechanism assembly after disassembly.
- Extension cords

EXT-KSRT002-18P(18 pin extension cord)

For connection between mechanism assembly and main board assembly.

Check for mechanism-driving section such as moter ,etc.

- Disassembly method. (Refer to mthod to remove main parts)
 - 1.Remove the bottom cover.
 - 2.Remove the front panel assembly.
 - 3.Remove the top cover. (Remove the screws at each side of heat sink and rear panel)
 - 4.Install the front panel (whose assembly was removed in step 2) to the main unit.
 - 5.Confirm that current is being is carried by connecting an extension cord jig.

- Connection diagram

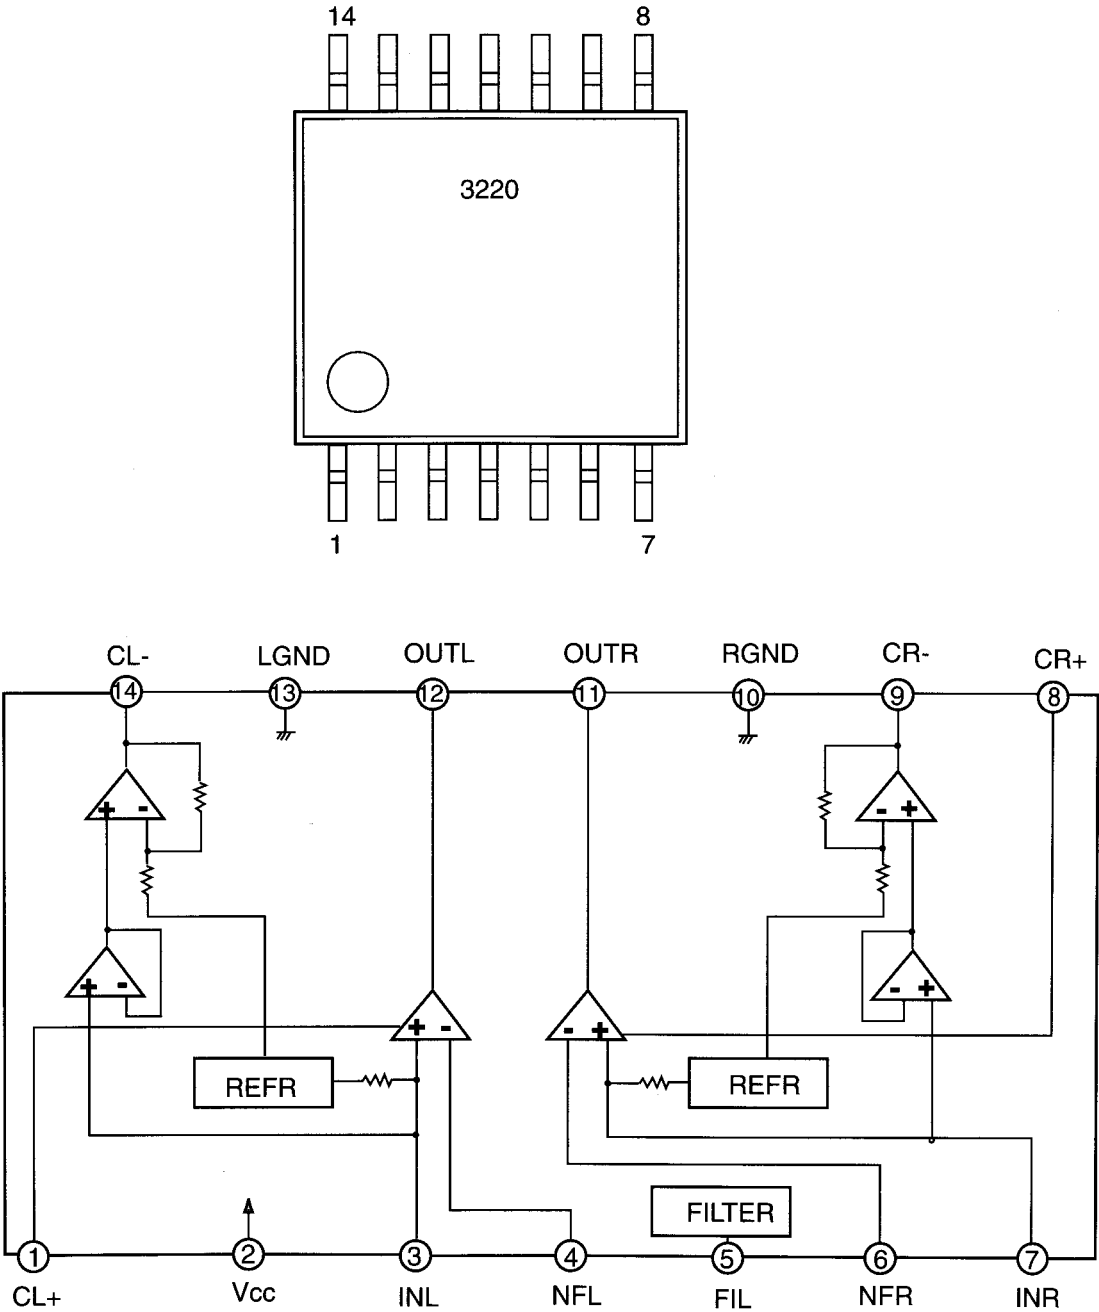

Head Amplifier Sections

Item	Conditions	Adjustment and Confirmation methods	S.Values	Adjust
1. Head azimuth adjustment	Test tape: SCC - 1659 VT703(10kHz)	<p>◆ Head height adjustment</p> <p>※ Adjust the azimuth directly. When you adjust the height using a mirror tape, remove the cassette housing from the mechanism chassis. After installing the cassette housing, perform the azimuth adjustment.</p> <ol style="list-style-type: none"> 1. Load the SCC-1659 mirror tape. Adjust with height adjustment screw A and azimuth adjustment screw B so that line A of the mirror tape runs in the center between Lch and Rch in the reverse play mode. 2. After switching from REV to FWD then to REV, check that the head position set in procedure 1 is not changed. (If the position has shifted, adjust again and check.) 3. Adjust with azimuth adjustment screw B so that line B of the mirror tape runs in the center between Lch and Rch in the forward play mode. <p>◆ Head azimuth adjustment</p> <ol style="list-style-type: none"> 1. Load VTT724 (VT724) (1 kHz) and play it back in the reverse play mode. Set the Rch output level to max. 2. Load VTT703 (VT703) (10 kHz) and play it back in the forward play mode. Adjust the Rch and Lch output levels to max. with azimuth adjustment screw B. In this case, the phase difference should be within 45° 3. Engage the reverse mode and adjust the output level to max. with azimuth adjustment screw C. (The phase difference should be 45° or more.) 4. When switching between forward and reverse modes, the difference between channels should be within 3 dB. (Between FWD L and R, REV L and R) 5. When VTT721 (VT721) (315 Hz) is played back, the level difference between channels should be within 1.5 dB. 	<p>S.Values</p> <p>Head shield</p> <p>The head is at low position during FWD.</p> <p>Head shield</p> <p>The head is at high position during REV.</p> <p>Output level: Maximum</p> <p>PBHead</p> <p>FWD Adj B</p> <p>REV Adj C</p> <p>HIGHT Adj A</p> <p>phase (0°) (45°)</p>	
2. Tape speed and wow flutter confirmation	Test tape:VTT712 (3kHz)	<ol style="list-style-type: none"> 1. Check to see if the reading of the F. counter/wow flutter meter is within 3015~3045(FWD/REV), and less than 0.35% (JIS RMS) . 2. In case of out of specification, adjust the motor with a built-in volume resistor. 	<p>Tape speed: 3015 ~3045Hz</p> <p>Wow flutter:less than0.35%</p>	Built-in volume resistor
Adjusting the frequency compare level	Test tape: VTT739 Output terminal for measurement: TP101 (L) TP201 (R)	<ol style="list-style-type: none"> 1. Playback the test tape VTT739. 2. Adjust the VR102 (L) and VR202 (R) so that the Dolby NR frequency compare level is $0 \pm 4\text{dB}$ (12.5kHz against 1kHz by TP101 (L), TP201 (R). 	<p>12.5kHz against 1kHz : $0\text{dB} \pm 4\text{dB}$</p>	<p>LcH : VR102</p> <p>RcH : VR202</p>
Adjusting the Dolby NR level	Test tape: VTT724 Output terminal for measurement: TP101 (L) TP201 (R)	<ol style="list-style-type: none"> 1. Playback the test tape VTT724. 2. Adjust the VR101 (L) and VR201 (R) so that the Dolby NR level is $27.5\text{mV} \pm 0.5\text{dB}$ by TP101 (L), TP201 (R). 	<p>27.5mV $\pm 0.5\text{dB}$</p>	<p>VR101 (L)</p> <p>VR201 (R)</p>

The tuner section is of an adjustment-free design. In case the tuner is in trouble, replace the tuner pack.

Description of major ICs

■ BA3220FV-X(IC121/IC221) : Line Out Amp

■ UPD178018AGC-543 (IC701) : MAIN SYSTEM CONTROL CPU

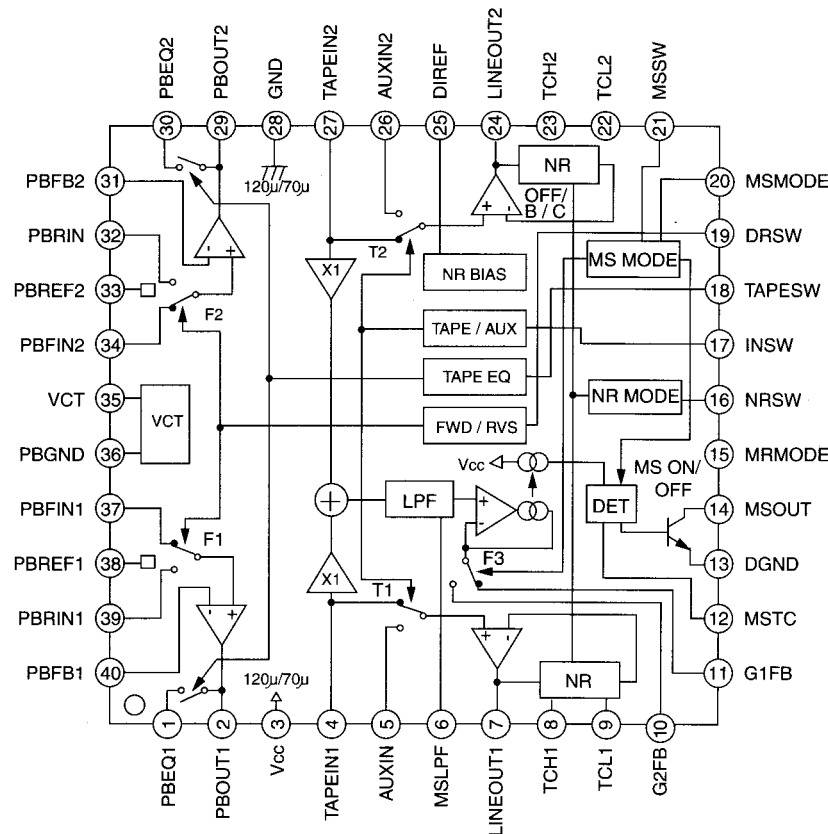

Pin No.	Port Name	I/O	Descriptions
1	KEY 0	I	Key input 0
2	KEY 1	I	Key input 1
3	KEY 2	I	Key input 2
4	LEVEL	I	Level meter input
5	SM	I	S.meter level input
6	SQ	I	S.Quality level input
7	LCD-CE	O	CE output to LCD driver
8	LCD-DA	O	Data output to LCD driver
9	LCD-SCK	O	Clock output to LCD driver
10	BUS-I/O	I	I/O selector output for J-BUS, H : OUT, L: INPUT
11	INLOCK	O	Tuner lock detection output Lock : H
12	BUS-SI	I	J-BUS Data input
13	BUS-SO	O	J-BUS Data output
14	BUS-SCK	I/O	J-BUS Clock in/output
15	SW-CONT	O	Sub woofer .PWM output for level setting
16	NC	O	Non connect
17	NC	O	Non connect
18	SW-MUTE	O	Subwoofer volume value 00.and mute L : output
19	NC	O	Non connect
20	AMP-KILL	O	AMP :OFF H:output
21	GNDPORT	-	Port GND
22	VDDPORT	-	Port Vdd
23	NC	O	Non connect
24	AFCK	O	AF check output, L: AF check
25	MONO	O	Monaural on /off selecting output, H:mono on
26	AM/FM	O	FM/AM switching output L : FM H : AM
27	SEEK/STP	O	Auto seek /stop selecting output, H: Seek, L:Stop
28	CRUISE	I	Pulse signal input port for Cruise control
29	IFC	I	FM/AM midle frequency counter input
30	VDDPLL	-	PLL Vdd
31	OSC	I	FM/AM limited generator frequency input
32	NC	I	None connect
33	GNDPLL	-	PLL GND
34	AMEO	O	AM error out output
35	FMEO	O	FM error out output
36	IC	-	GND
37	SD/ST	I	Station detector, Stereo signal input, H:Find Station, L:Stereo
38	STAGE0	I	Pull up
39	LOCAL	O	Local ON / OFF switching output H : on
40	F/R	I	FWE.REV running direction switch signal input. L : FWD L : REV

■ UPD178018AGC-543 (IC701) : MAIN SYSTEM CONTROL CPU

Pin No.	Port Name	I/O	Descriptions
41	MSIN	I	MS input
42	DOLBY	O	Dolby on "H" output
43	FF/REW	O	Output for input signal level switching for MS L:FF.REW H:PLAY
44	TAPE IN	I	Cassette in detection input H : cassette in L : cassette out
45	I2C-CLK	O	I2C information clock output
46	I2C-DAO	O	I2C information data output
47	I2C-DAI	I	I2C information clock input
48	MOTOR	O	Main motor output H : motor works
49	MODE	I	Mechanism mode position detection input
50	STANDBY	I	Standby position detection input H : eject side L : operation side
51	SUBMO-	O	Sub-motor clock direction drive output
52	SUBMO+	O	Sub-motor clock opposite direction drive output
53	T-END	I	Tape end detection input H : PLAY
54	KICK	O	Kick output L : kick
55	TPF CNT1	O	Sub-woofer cutting off frequency control output
56	LPF CNT2	O	Sub-woofer cutting off frequency control output
57	BEE	O	BEE, ON/OFF switching H : ON
58	OPEN	I	Door open detection input H : Open
59	BEEP	O	Touch tone output
60	MUTE	O	Mute output , L : mute on
61	POWER	O	Power ON /OFF switching output , H : power on
62	TEL-MUTE	I	Telephone mute signal detection input
63	DIM-IN	I	Dimmer signal detection input L : dimmer
64	DIM-OUT	O	Dimmer control output , Dimmer off L output
65	VOL-1	I	Rotary volume signal 1 input Power save : L
66	VOL-2	I	Rotary volume signal 2 input
67	PS1	I	Power save 1 Working together ACC Power save : L
68	PS2	I	Power save 2, Working together Back up by H input, stop mode
69	RDS-SCK	I	Clock input for RDS
70	RDS DA	I	RDS data input
71	REMOCON	I	Remocom input
72	DETACH	I	Detach signal input H : Power save
73	BUS-INT	I	Cut-in input for J-BUS signal
74	REGCPU	-	Regulator for CPU power supply, Connect the GND with 0.1 μ F.
75	GND	-	Ground
76	X2	-	Connecting the crystal oscillator for system clock
77	X1	I	Connecting the crystal oscillator for system clock
78	REGOSC	-	Regulator for oscillator circuit. Connect the GND with 0.1 μ F.
79	VDD	-	Vdd
80	NC	-	Pull up

■ CXA2510AQ (IC901) : Head AMP / Dolby

2. Pin Functions

Pin No.	Symbol	I/O	Functions
1	PBEQ1	O	Resistance for selecting the equalizer amplifier time constant.
2	PBOUT1	O	Playback equalizer amplifier out put.
3	Vcc	-	Power supply
4	TAPEIN1	I	TAPE input.
5	AUXIN1	I	External input.
6	MSLPF	-	Cut-off frequency adjustment of the music sensor LPF.
7	LINEOUT1	O	Line out.
8	TCH1	-	Time constant for the HLS.
9	NC	-	Non connection.
10	G2FB	-	Music signal interval detection level setting.
11	G1FB	-	
12	MSTC		Time constant for detecting the music signal interval.
13	DGND	-	Logic ground (Connect to GND)
14	MSUOT	O	Music sensor output.
15	NC	I	Non connection.

Pin No.	Symbol	I/O	Functions
16	NRSW	I	Dolby NR control L:NR OFF H:NR ON
17	INSW	I	Line amplifier input select control L:TAPE IN H:AUX IN
18	METAL	I	Playback equalizer amplifier control L:120us H:70us
19	DRSW	I	Head select control L:FORWARD H:REVERSE
20	FF/REW	I	Music sensor mode control Low(open):G1 High:G2
21	MSSW	I	Music sensor control Low(open):MS on High:MS OFF
22	NC	-	Non connection
23	TCH2	-	Time constant for the HLS
24	LINEOUT2	O	Line output
25	DIREF	-	Resistance for setting the reference current (Connects 20(18)K Ω between DIREF pin and GND for the standard setting.)
26	NC	-	Non connection.
27	TAPEIN2	I	TAPE input.
28	GND	-	To ground.
29	PBOUT2	O	Playback equalizer amplifier output.
30	PBEQ2	O	Resistance for selecting the playback equalizer amplifier time constant
31	PBFB2	I	Playback equalizer amplifier feedback.
32	NC	-	Non connection.
33	PBREF2	O	Playback equalizer amplifier reference (Vcc/2 output)
34	PBFIN2	I	Playback equalizer amplifier input (FORWARD head connected)
35	VCT	O	Center (Vcc/2 output)
36	PBGND	-	Playback equalizer amplifier ground (Connect to ground)
37	PBFIN1	I	Playback equalizer amplifier input (FORWARD head connected)
38	PBREF1	O	Playback equalizer amplifier reference (Vcc/2 output)
39	NC	-	Non connection.
40	PBFB1	I	Playback equalizer amplifier feedback.
